SoftTouch™

SoftTouch™ Duct Wrap

SoftTouch Duct Wrap is a fiber glass blanket-type insulation solution that reduces heat transfer through the ductwork walls and improves system performance while saving energy. SoftTouch provides thermal efficiency that reduces unwanted heat loss or gain from equipment and ductwork.

The vapor retarder facing helps to eliminate condensation on cold ductwork surfaces.

Organic Binder

SoftTouch is manufactured with low-emitting binders to reduce VOCs and meet GREENGUARD® Gold standards for low chemical emissions. It's our commitment to building a sustainable environment.

Installer Friendly

SoftTouch features low fiber and dust generation for a low-itch product that's easy on installers. The SoftTouch mat cuts better than competing products, providing more efficient installation with less waste and easier handling in the field.

Consistency

We have employed world-class quality control measures that align our specifications with expectations for a consistent product.

WideWrap® Sizes

SoftTouch is available in wider 5-foot widths for installations that require longer duct sections. Reducing the need for additional cutting or fitting up of shorter duct wrap sections can result in up to a 20 percent savings in labor while providing a cleaner-looking installation. All WideWrap Duct Wrap products are engineered to insulate rectangular and round heating, ventilating and air conditioning ductwork. Constructed specifically to accommodate larger ducts, the 5-foot widths allow for less labor, reduced waste and a cleaner finished appearance.
