

# FLASH™ DETECT INJECT

## FINDS LEAKS FAST

Flash™ Detect Inject is an integrated UV dye solution that injects just like Flex Inject® Sealant Advanced and Total without the use of tools or manifold gauges. As soon as it enters the system, the green dye quickly exposes leaks with the use of a UV light (the Cliplight by DiversiTech 89DC is recommended). Flash™ Detect Inject is ideal in locations where leaks are not easily spotted with conventional methods. The highly soluble fluid exposes all leaks, making them easy to find. You can then use either DiversiTech's Super Seal Sealant Advanced (can version) or Flex Inject® Sealant Advanced (flexible hose version) to fix the leak.

### Flash™ Detect Inject finds leaks fast with:

- Instant distribution
- Green dye that escapes when leaks are present
- All oils and refrigerants
