Back Mounted Condensing Unit

EPB & EOTP – Series

Reference Model : EPBSR2

Sleek and Practical Top Pan Area
Compliment any space with polished and easy to clean stainless steel top pan rails, adaptable pan dividers, sleek tray panels and a well insulated pan lid.

Detachable Cutting Board
Sanitary, plastic cutting board is removable for easy cleaning and maintenance.

Strong Door Seal
Heavy duty door hinge and gasket for air tight seal.

Epoxy Coated Shelves
Durable, epoxy coated shelves provide dependable storage options.

Shelf Clips
Heavy duty stainless steel shelf clips.

Heavy Duty Pilasters
Solid stainless steel pilasters support adjustable steel clips and white epoxy coated shelves for more storage options.

5" Overall Height Swivel Casters
Sturdy swivel casters or stationary legs variants come standard in select units.

Thick Insulation
2 1/2 inch thick insulated door allows better heat transfer for a stable cabinet temperature and improved energy efficiency.

● Unit Exterior ○ Unit Interior

Recessed Door Handle
Our solid door models feature a sleek recessed door handle for a non-obstructive, maximized work space.

Air Flow Vents
Strategically placed refrigeration vents for the top pan area will keep food fresh even in the most extreme foodservice environments.

Insulated Pan Lid
Insulated top pan lid keeps temperature steady in the top pan section and protects from severe condensation. The lid is detachable for prep accessibility and easy cleaning for select units.

Rear Bumpers
Rear bumpers allow for unobstructed ventilation of the refrigeration system.

Analog Control
Effortlessly adjust your equipment to the desired temperature with the classic, easily accessible analog thermostat located in the cabinet interior.

Defrost Timer
Tamper-free defrost timer can be easily accessed and reset in a few simple steps.

Slide-Out Condensing Unit^a
Back mounted condensing unit slides out in just a few easy steps for unrestricted access to the refrigeration components.

Vacuum Relief U-Trap
U-Trap effectively relieves the cabinet of pressure for smooth and rapid door re-entry.

Front Breathing Vents
Efficient ventilation system draw and discharge air from the front grill maximizing space and energy usage.

Stainless Steel Exterior & Interior
Rounded, high quality stainless steel exterior and interior provide an elegant and durable storage space.

5 YEAR Compressor
3 YEAR Parts & Labor

Triple Function Hot Gas Pipe System^a

Do more with less energy thanks to the multitasking capabilities of the Triple Function Hot Gas Pipe System. Like its counterpart, it significantly boosts energy efficiency without relying on electrical heaters. The deliberate routing of hot gas through well-placed high pressure pipes removes surplus heat from the condenser coil, cools down the compressor and quickens the evaporation of overflow moisture in the self-contained hot gas pipe assembly. What this means is a symbiotic set up that recycles energy instead of wasting it.

Vacuum Relief Mechanisms

The U-Trap further equalizes air pressure thanks to a responsive air flap that quickly swings open whenever a door is opened or closed.

The ridge-Lined Door Gasket greatly reduces surface suction between the door and the door frame while still maintaining an air tight seal.

Heavy Duty Swivel Casters^b

Sturdy swivel casters or stationary legs in 5" or 3 1/2" (total height) variants come standard.

Specifications subject to change without notice.

Product dimensions are for general purposes and not absolute value. Product capacity is calculated based on standard industry figures. Slight variations may exist. If dimensions and capacity are critical, please contact Everest Refrigeration.
