

ULTRA-ZONE[®]

Zone Control Systems

RSD Round Spring-Return Zone Dampers

RSD

The RSD series of Ultra-Zone dampers was designed for those in need of a damper with a simple two-wire, spring-return motor. This damper is male crimped on one end to increase ease of installation.

The RSD damper comes with a 24 Volt spring return motor. The motor is field reversible. RSD dampers combined with an Ultra-Zone zoning system provide the most comfortable and reliable system in the industry.

The RSD is available in sizes 4" thru 20" in even inch increments with custom sizing available. The motor has 4 in-lbs of torque except for sizes 18" and 20" which have 18 in-lbs of torque. The units ship configured in the open, resting (unpowered) state.

- Flexible door edge allows for smooth operation even if unit is slightly out-of-round
- Nylon shaft provides thermal barrier to eliminate condensation
- Simple slide adjustment to control blade travel
- 5 year parts warranty and tech support just a phone call away
