SC57 Reading Hertz

SC57 Receiving Temperature Measurement -- Wirelessly

SC57 Reading Amperage

Packed with measurements HVACR professionals use everyday, the new SC57 swivel-head meter is the first clamp meter that takes wireless HVACR readings from 75' away. So, now measurements can be sent right to your meter, from anywhere on the jobsite. Get wireless readings like:

- Indoor wet bulb while you're at the condenser
- Amps from behind a sealed blower door
- Vacuum readings while walking around the job site
- Plus anything else our Accessory Heads can measure

## The Right Stuff for HVACR Pros

- **Fast Reacting**
- **True RMS**
- **Packed with HVACR Measurements**
- **180° Swivel-Head for a Clear View**
- **Withstands Harsh HVACR Conditions**
- **LED Clamp Flashlight for Dark Areas**
- **Bright, Blue Backlight**
- **Works Wirelessly w/Fieldpiece Accessory Heads**
- **Non-Contact Voltage Alert for Safety**

The non-wireless version, SC54, is also available -- same great measurements, just without the benefits of wireless measurements.
