

Do More with One Tool

Test Tools HVACR Pros Trust

Measures Both Sides of the Evaporator in **Real-time:**

- Supply Wet Bulb
- Supply Temp
- Return Wet Bulb
- Return Temp

Supply
Temp & WB

Return
Temp & WB

- Simultaneously measures supply wet bulb & temp, *and* return wet bulb & temp in real-time.
- Easily checks Delta-T the right way – with TEET.
- Monitors enthalpy (BTU) change across evaporator in real-time.
- Verifies actual performance based on indoor heat load.
-  Sends all 4 values wirelessly to the HG3 System Analyzer for further live analysis.
 - Make adjustments outdoor, based on live, dynamic, indoor readings.
-  Sends return wet bulb wirelessly to SMAN4 Digital Manifold for Target Superheat.
