TOOL BOOK

Work. Perform. Outlast.

Malco®
Est. 1950

Dear Malco Customer,

First and foremost, on behalf of the entire Malco Products company, I'd like to extend a giant "Thank You" to all of you for your patronage over the years. Some of you have been with us from the beginning back in the 1950's and some of you have found us just recently, but we could not have developed into the company we are today without all of you. We're proud of what we've become at Malco, from a tiny startup company that worked out of a garage in Minneapolis to our headquarters in Annandale, Minnesota, where we serve trade professionals in the United States and around the globe.

Our longstanding traditions of quality and innovation are our hallmark and we strive every day to live up to those traditions to continue to serve you. Malco Products is now the nation's leading manufacturer of "tools of the trade" for HVAC professionals and also a prominent manufacturer of trade tools for roofing, siding, gutter and fencing.

Malco excels at understanding industry's ever-changing workplace needs, and workforce demographics, as it affects a tool's hand fit and weight. Our formal research and development process, and award-winning product design team, are validated by a knowledgeable network of established sales representatives, broad-based distribution and a vast population of industry technicians and educator end users. The result is a steady stream of innovative and dependable products every month, every year! Malco product introductions are typically specialized by industry and are one of a kind.

Our early product line of crimpers, seamers, notchers and punches have since been joined by hundreds of other specialty tools. Malco is still known for regularly introducing new hand tool designs and modifications for the market. Simply put, Malco continues its founder's tradition of leadership and innovation by addressing a changing industry landscape and responding to emerging market needs for new specializations and more customized products and services.

We manufacture work saving products that make the tough jobs easier. At Malco we've always told you that our success has stemmed from our innovation and our quality of products. We stand behind those claims with our lifetime limited warranty. As a ESOP (Employee Stock Ownership Plan) company, it's in all of our best interests here at Malco to continue to deliver the highest quality products.

We here at Malco wish you nothing but success in your professional pursuits and hope that we can continue to satisfy you with our innovations and improvements. We look forward to continuing our success story with the hope that our success leads to more wins for you, our customer. Once again, we thank you for your continued patronage and know that we are here to support your work, with performance-based tools that outlast our competition. Please enjoy this catalog!

Sincerely,

Mardon Quandt

Create a Custom Kit Info:

- Specify a minimum of 6 different Malco hand tools per Custom Kit.
- Select tools that fit the inside dimensions of the tool bag:
(Estimated maximum of 30 different tools under 17 in. / 43 cm long.)
- Tool Kits include a package card listing the kit contents you requested.
- Tools and packaging are supplied separated in tool bag for efficient packing and to avoid damage in shipment. Co-Branded Tool Packaging is also available subject to quantities and selection published in Malco's "Custom Crafted Packaging" brochure #SL13847. Add 3-Days to lead-time if including custom packaging with kit contents.
- **10% Discount on School Orders!** Remember, all Malco Custom Kits that you sell for use by students are invoiced at the quoted price less 10%. Provide a copy of the school's purchase order to verify discount for passing along to school.
- Malco will assemble and ship your custom tool kits within 3 days of receipt of your completed order.
- Ask your local Malco Distributor for details and a quote.

Self-Piercing Sheet Metal Screws

Rated #1, Zip-in® screws are the best selling sheet metal screws worldwide.

A unique thread design and quality controlled manufacture spell the Zip-in® difference.

Zip-in's® sophisticated heat treat process allows the screw to taper to a fine, sharp point without sacrificing critical point strength. A single starting thread (A) is machined down to the very tip of the point and is the source of Zip-in's® penetrating power. The second thread (B) above the point engages after initial penetration and moves the screw through very fast. Zip-in® screws are faster driving, with a greater capacity for fastening heavier gauges of sheet metal than any other self-drilling type.

1. Undercut-Indented Hex Washer Slotted Head

- Undercut - Always seats flush

2. Burr Free hex washer slotted head

- One 1/4 in. hex driver accommodates all sizes of Zip-in Screws
- Full 1/4 in. (No. 8) head will not strip out of hex driver opening at any-time during operation.

3. Combination Lead Double Thread

- Starting thread machined down to very tip of screw point
- Instantly penetrates and engages in heavy gauge sheet metal and layered light gauge

4. Sharp Tapered Point

- Quality controlled heat treat
- Sharp tapered point will not mushroom, break or walk
- Complete operator control with precise hole alignment.

U.S. Patent No.
DS24,638

Look for the Dots!® Trademarked & Patented Head Markings indicate one and only genuine Zip-ins®.

Drill & Tap Screws

The One Operation Fastener with a True Drilling Action Point

Bit-Tip Drill and Tap Screws produce the optimum hole size for a quick tight fit

By drilling its own hole, Bit-Tip® produces the optimum hole size, resulting in better thread engagement and a tighter fit. One operation fastening also means no alignment problems.

Bit-Tip® has a wide range of industry applications. Select the Bit-Tip® that's right for the job. Point length will determine metal thickness that can be drilled, tapped and fastened.

Also, plywood, soft wood, composition board, drywall, insulation and laminates may be fastened to metal framing or components.

Made from strong, high quality, specially heat treated steel. Bit-Tip® Self Drilling and Tapping Screws are precision cold forged insuring uniformity of dimension and drill point contours.

The versatile Bit-Tip® Screw is an excellent replacement for fastening operations now using rivets, nuts and bolts, spot welds or adhesives. Bit-Tip® also eliminates the need for costly auxiliary fastening equipment such as drill bits, taps and welding equipment.

Requires only a standard screw gun power tool rated at 2500 RPM equipped with drilling depth locator.

Now even faster!

Drill & Tap Screws drill their own holes, taps a matching thread in steel .220 thick in less time than it takes to drill a pilot hole for other standard fasteners.

Industrial Applications:

Choose from Hex or Slotted

A pair of heavy-duty, quilted work gloves with a textured palm side is shown. A Malco TurboShears tool, which has a black handle and a silver blade, is positioned diagonally across the gloves. The background is dark and textured.

Turboshears with a **Twist**

New features make the best even better!

Rotating head keeps drill clear of the material.

Drill Attachments

- 18 ga. Metal Cutting
- Double Cut Metal Cutting
- Corrugated Metal
- Fiber Cement Siding
- Fiber Cement Backerboard
- Vinyl Siding
- Asphalt Shingles
- Natural Roofing Slate

Patented 360° Rotating Head

The 360-degree rotating head, now standard on most TurboShear models, allows users to position and lock the drill so it doesn't interfere with material for quick, hassle-free cuts every time!

Telescoping Drill Clamp

More compact Telescoping Molded Drill Clamp fits drills and impact drivers large and small- including newer lithium-ion models. Allows tool to rotate 360° and lock into position. The adjustment wrench stores with the tool, preventing loss.

Metal Cutting - 18 ga.

TurboShearHD

Long lasting blades make fast, smooth trim cuts and tight circular or rectangular cuts in metal ductwork, metal roofing and metal building panels.

This well tailored attachment quickly inserts into the chuck of a corded or cordless drill to make fast straight, curved or square cuts in most common sheet metals. A sleek, lightweight aluminum cast shear head and molded drill clamp allow maximum portability and ease to go wherever the work is.

Corrugated Metal Cutting - 30/24 ga.

TurboShearCM

Easily cut corrugated mild steel with ease. Attach to any drill to navigate cross cuts in metal roofing panels.

This versatile and portable TurboShear fits a drill you already own to make easy cross cuts, fast lengthwise cuts, even circular and square outlets cuts in large or small pattern corrugated metal roofing and most trapezoidal (box) pattern metal roofing panels.

Elongated blades with compact jaws create a steep 75-degree offset for a nearly vertical approach when starting a cut.

Double Cut Metal Cutting - 18 ga.

TurboShearMD

Attach to any drill for easy, clean shearing on both edges of cut. Cut either direction, as scrap spirals out of tool path when cutting.

The Double-Cut TurboShear removes a narrow spiral scrap from the tool path to produce a clean, straight edge on both sides of the cut. Approach a cut from either end to produce a quality work-piece edge. Also navigate up to 90° outside profiles of metal roofing panels, or metal ductwork, and cut through seams!

Vinyl Siding Cutting

TurboShearVC

Use your Drill to navigate all Popular Vinyl Siding Styles and power your way through thick lock seams and profiles.

Vinyl Cutting TurboShears provide easy scissor action for making straight cuts, circles and squares in vinyl siding. A knife-like beveled blade edge quickly penetrates siding to start cut. Non-slip blades and 3/8 in. (9.53 mm) jaw opening tackles lock-seams with ease. Wide jaws combined with a 3/4 in. (19.05 mm) length of cut makes easy work of cutting through siding profiles.

Asphalt Roofing Shingles - 1/2 in.

TurboShearSS

Attach to any drill for fast straight cuts, circles and squares in heavy asphalt shingles.

Make fast, clean, trim cuts in multiple layers of asphalt shingles, up to 1/2 in. (12.7 mm) thick. Easily shear along a roof valley, or make tight left square cuts and circles to fit around utility outlets, with equal precision and ease. An extra-wide jaw opening with beveled lead-in tip on the upper blade handles multiple shingle layers. And a wide, flat lower blade offers exceptional operator control. Heat-treated carbon steel blades with solid carbide inserts hold their edge longer in any life-rated shingle or shingle thickness.

Fiber Cement Siding - 5/16 in.

TurboShearFC

Make your drill a Fiber Cement Siding Shear!
Cuts 5/16 in. (8 mm) Fiber Cement Siding Plank with Minimal Dust!

A wide skid-plate on the head design stabilizes cutting action for extra-smooth results in 5/16 in. (8 mm) fiber cement siding plank. This versatile shear also navigates curved-pattern cuts for window and door arches. One blade and skid plate set will last an average of 30 residential siding projects. You can even rotate the tool's skid plate to maximize cutting life.

Hole Cutters

Sheet Metal Circles made easy.

HC1
2-12 in. (51-305 mm)
Diameter Circles

HC2
2-20 in. (51-508 mm)
Diameter Circles

Distinctive gold bits, bearings and pivot pin signify the longest lasting, fastest cutting, easiest adjusting solution for cutting holes in sheet metal.

Lightweight aluminum frames make these accessories extremely portable for a variety of hole cutting applications in sheet metal including 20-gauge (1.02 mm) galvanized steel. A compact model HC1 Hole Cutter is adjustable for making 2 to 12 in. (51 to 305 mm) diameter holes. The larger HC2 model cuts 2 to 20 in. (51 to 508 mm) holes. A combination English/Metric diameter gauge is included on the adjustable pivot slide for both, also including the same mill-type Cutter Bit and replacement parts.

Malco Hole Cutters quickly install into the chuck of any corded or cordless drill as small as 1/4 in. (6.35 mm).

Gold Standard Cutter Bits

The Real Difference

Malco cutter bits feature a long lasting, mill type cutting edge and large flat for adjusting the cutting edge location up or down to extend bit life. One cutter bit fits either model and is easily replaceable. Available in 1 packs (CB), 6 packs (CBB) and 100 Bulk Packs (CB100).

HCAD

Angle Drive Accessory

May be used to help cut take-off holes in ductwork suspended below floor joists or for take-offs from the side of large trunk lines where reaching up and cutting at 90° is desirable.

Fits 1/2 and 3/8 in. (12.7 and 9.5 mm) electric drills. Comes with own chuck.

C5A2

TurboCrimper Impact

Get the competitive edge with a labor saving, cost-saving TurboCrimper impact driver attachment. **78% faster than hand tools!** It also eliminates the need for costly couplings.

**Crimps 30 – 24 Ga.
(0.41 - 0.71 mm)
Galvanized Steel**

5X FASTER THAN HAND CRIMPERS

Use Impact Driver Only!

Min. 12V DC Impact Driver with quick release 1/4 in. Hex Chuck.

Based on actual field trials. The Malco TurboCrimper IMPACT is designed to work with a Minimum 12 Volt DC Cordless or Maximum 7 Amp AC Corded IMPACT DRIVER equipped with a Quick Release 1/4 inch Hex Chuck.

CHUCK IT UP AND GO

No set-up or adjustment is needed to immediately begin crimping multiple sizes, types and thickness of round metal duct, including spiral duct, and metal stove pipe.

TIME SAVING, LABOR SAVING

Simple effective design increases speed and ease of crimping 30 – 24 gauge (0.41 – 0.71 mm) galvanized steel round duct and (0.31 - 0.61 mm) cold rolled steel stove pipe.

STORAGE? NO PROBLEM.

The compact TurboCrimper IMPACT is easy to balance while in use and stores easily in a pouch or bag when not in use.

TurboCrimper

Use your existing drill to save time and effort crimping 30 to 24 ga. (0.41 to 0.71 mm) galvanized steel duct, spiral duct, aluminum pipe or (0.61 to 0.31 mm) black stove pipe!

Drill Not Included.
Patented

The rotation of the meshing teeth on the adjacent gears drives the metal out the right side of the tool head. Use the throat depth line as a guide to control the length of the crimp.

Use the crimper depth adjustment lever, in the down position, to open gears for easy insertion and removal of metal. The narrow point of entry in the face of the tool prevents fingers from entering the gears that produce the crimp. • Start the crimp to the left of the duct or pipe lock-seam. With the lever in the up position, the maximum crimping depth is factory set for optimal results in 26 to 28 gauge (0.56 to 0.48 mm) galvanized steel. Back off the lever for lighter metals or re-adjust the maximum crimp, per operators manual, for heavier metals. A clutch in the gear mechanism prevents damage to the crimper attachment if seams are encountered that exceed crimper capacity.

Max2000 Aviation Snips

Nothing outcuts, outmaneuvers or outlasts Max!

MAX
2000
**M2001****M2003**

Max2000 Left, Right, and Combination Aviation Snips

feature alloy steel blades with serrated lower jaws for solid gripping power in sheet metals, vinyl plastics, layered metals and seams (including "S" cleats).

**M2002**
 Sharp Tipped
Center Jaw
M2004

The Max2000 Double Cut Snip employs a best of all worlds close tolerance design for consistent performance. A curved cutting edge on the center jaw reduces cutting force required and large relief grinds on all jaws minimize drag. The double cut blades feed smoothly, cut cleanly without surface distortion, and easily navigate metal seams encountered in round metal duct and stove pipe. A self-starting point on center jaw makes short work of blind cuts.

**M2006****M2007**

Versatile Max2000 Offset Right and Left Aviation Snips

feature a serrated upper jaw of hardened alloy steel and a forged steel lower jaw to produce a strong, sharply defined cutting edge for superior offset maneuverability and cutting performance.

**M2005**

The Max2000 Bulldog Snip

features shorter blades with a serrated lower jaw for controlled notching and trimming out to the blade tip in layered sheet metals and metal seams.

AVs Mini-Snips

BIG performance miniaturized.

Real Performance in a compact lightweight snip, designed for challenging tight spots

AVM6EV

AVM7EV

- Forged steel jaws with precision-ground serrations on the lower blade produce a sharply defined edge for cutting accuracy and control.
- The AVsMini left and right cutting offset design provides superior material flow in 24-gauge (0.61 mm) cold rolled and (0.71 mm) galvanized steel for making sharp square cuts, tight 5 inch (125 mm) diameter circles and straight line cuts, even on curved surfaces.
- With overall length of 7-1/8 inches (181 mm), the AVsMini easily works in tight or awkward spaces where full-size aviation snips are challenged.
- A 3/4 inch (19 mm) length of cut provides the optimum speed for confined cutting applications where this small, maneuverable snip excels.

Aviation Snips Forged Steel Aviation Snips

AV1

AV3

AV's Offset Right & Left Forged Snips

Forged steel upper and lower jaws with torsion handle spring and latch

AV7

AV's Left, Right & Combination Aviation Snips

Traditional design with forged steel jaws, torsion handle spring and side latch.

AV2

AV6

Vertical Forged Steel Aviation Snips

AV's Left & Right Vertical Aviation Snips

Left and Right Cutting forged serrated edge steel jaws are set at a 90 degree angle to allow easy access when cutting sheet metal in tight spaces, or overhead.

AV8

AV9

Easily Reach Tight Spaces & Cut Overhead.

Ultra

Lightweight Snips

**Heavyweight Attitude
at less than 10 ounces!**

ULC10

Includes a Full Size Handle!

- Strong, Lightweight 10 in. (254 mm) Polymer Frame
- Easy-To-Grasp, Protective Handle Loops
- Big 3 in. (76 mm) Long Controlled Cut
- Designed for all weather conditions
- Replacement Blades are easily installed.

Worry-Free Blade Changes! Malco Ultra Lightweight Snips utilize a fully threaded brass insert thermally anchored in the blade area of the polymer frame for holding power and no loss of thread integrity.

Pattern, Bulldog & Duckbill Forged Steel Snips

**Regular
Pattern Snips**
for straight cutting
and wide curves.

Bulldog Pattern Snips
Big, Powerful snip for straight
cuts and notches.

**Circular
Duckbill Snips**
Maneuver and cut easily
to the very tip of blade.
Cut a variety of material
without tearing or catching.

5-Blade Crimper

Longer, shallower crimps produced with the C5R result in a tighter fitting, more self supporting, leak-proof connection in sheet metal pipe & duct.

Easy Hand Motion and Greater Control:

A superior compound leverage mechanism offers maximum ease of operation. Comfortable opening, spring-actuated handles, give additional comfort and control. Ergonomic Redline Handles with unique one-hand operation latch offer maximum compound leverage performance and natural fit and feel.

Longer Lasting Performance

Wear resistant, hardened steel construction throughout! Hardened steel also produces greater handle strength to resist abuse and collapsing. Nickel plating resists elements.

Offset Crimper

3-Blade Crimper

Single Crimper

Ideal offset crimper for tight-working quarters or working over-head.

A unique blade design keeps handles offset and keeps hands off work obstacles such as floor joists and underlayments. The handle design also promotes correct gripping of tool resulting in less wrist fatigue. Long wearing steel components are nickel plated to resist elements.

Ideal for crimping heavy 24 to 22 gauge (0.71 to 0.86 mm) galvanized sheet steel.

Long wearing steel components are nickel plated to resist elements. Ergonomic Redline Handles with unique one-hand operation latch offer maximum compound leverage performance and natural fit and feel.

Fast, easy to use and lightweight. Handy lock makes tool pocket sized.

Rust-resistant, zinc plated steel construction with vinyl cushioned grips.

Replacement Spring for Hand Tools

5018 Fits C5R, C6R and SC3R

Hand Notcher

Fast and easy cutting. Notcher makes a clean 30° "V" shaped cut in sheet metal.

13/16 in. (20.6 mm) maximum throat depth. Upper cutting jaw is drop forged high impact alloy steel. Hook design of cutting jaw facilitates notching corners or take-off tabs to desired depth without slipping. Long-wearing, hardened stamped steel components feature rust resistant nickel plate and black oxide finishes. Ergonomic Redline Handles with unique one-hand operation latch offer maximum compound leverage performance and natural fit and feel.

One-Inch Notcher

Provides more clearance for folding and fabricating metal ductwork

Snap Lock Punch

The N2R Notcher punches a big 1 in. (25.4 mm) deep "V" notch in common 24 to 30 (0.71-0.41 mm) gauge galvanized sheet metal quickly and easily.

Folding and fabricating metal ductwork is easier than ever with the full 1 inch clearance that the N2R single operation notcher provides. Precision-ground steel upper jaw and hardened stamped steel components feature rust-resistant black oxide and nickel plated finishes. Ergonomic Redline Handles with unique one-hand operation latch offer maximum compound leverage performance and natural fit and feel.

Join sheet metal, duct and pipe sections economically.

No need for extra hardware. Punches raise a louvered shaped projection on metal edge for locking into rolled edge of sheet or piece to be joined. Metal pieces snap together and are fastened securely. Compound Handle Leverage for maximum ease of operation. Punch impression spaced 3/8 in. from edge of metal. Heavy forged cutting jaw. Rust resistant nickel plate and black oxide finishes. Ergonomic Redline Handles with unique one-hand operation latch offer maximum compound leverage performance and natural fit and feel.

Hand Seamers

Die-Cast Zinc Jaws

Die-Cast Zinc Jaws

**S5R**

Compact 5 in. (127 mm) Jaws
with Big 2 in. (51 mm) Bending Depth

Not for
use with
Steel

**S9R**

Big 9 in. (229 mm) Jaws
with 2 in. (51 mm) Bending Depth

Not for
use with
Steel

Easy Folding Bends without ruining paint finish!

Die cast zinc jaws are gentle on painted or coated metal surfaces and ideal for making clean and accurate bends and seams in aluminum roof flashing, coil stock or fascia.

The jaws feature depth graduations in 1/4 inch (6.35 mm) increments to a maximum 2-inch (50.8 mm) bending depth. The jaws of these large die cast seamers are bowed so that they will hold firmly and evenly across the entire jaw width even when engaged on very light material. The large surface coverage of these jaws also has an appeal for limited flattening / straightening tasks in light gauge painted steel. These Seamers are not warranted for use as a striking tool or for prying or bending heavy ferrous sheet metal. Durable construction offers long, dependable service life under normal use. These tools also feature rust resistant nickel plating.

with Offset Handles

Forged Steel Jaws

**S6R**

6 in. (152 mm) Jaws

Forged Steel Jaws

Precise vee-notched depth graduations on jaws are in 1/4 in. (6.4 mm) increments.

Jaws are drop forged, high impact steel. Hardened steel handles resist abuse. Powerful compound leverage design. Tool also features rust resistant nickel plating. The S6R features wide 6 in. jaws that produce uniform, accurate bends in sheet steel and non-ferrous metals with greater control and efficiency. Wider jaws also minimize buckling and bowing of metal. Fewer strokes are required to bend and straighten angles. Designed for all the metal trades, including HVACR installation, roofing and siding applications and commercial building and remodeling.

Catalog Number	Description	Jaw Depth in. (mm)	Jaw Width in. (mm)	Variable Leverage Ratio (High / Low) throughout stroke	Jaws	Length in. (mm)	Net Wt. oz. (g)

Mini-Brake®

Compact & Portable

Make big or small fabrications on the job with this lightweight and portable tool! The versatile Mini Brake produces bends up to 135 degrees in sheet metals, including aluminum, copper and 22-gauge galvanized steel. The brake's compact size can accommodate sheet metal stock up to 4-feet wide, in any length, because there is no fixed throat depth to contend with.

Use the Mini Brake anywhere on the job site, even on a truck tailgate, for a variety of fabricating tasks from large HVAC transitions to narrow roof flashing to structures as small as a 4-inch square. Strengthening ribs on the brake's anvil and apron assure consistent bends. A safety conscious, cam-over style clamping mechanism, similar to much larger shop-floor brakes, keeps the anvil secure in any position. Optional legs are available separately.

Compact size makes the Mini Brake suitable for use virtually anywhere on the job site. Extra wide feet offer stability even when operating on a truck tailgate.

Makes bends to 135 degrees in galvanized sheet steel up to 22 gauge (0.86 mm)

MB48A

MBL
Optional Leg Kit
(Sold separately)

A 5/16 in. (7.9 mm) plate steel apron & adjustable strengthening ribs on anvil assure uniform bends across width of material.

Accommodates sheet metal up to 48 in. (1.2 m) wide in any length. There is no fixed throat depth to contend with.

Versatile bending range accommodates compact fabrications as small as a 4-in. (101.6 mm) square.

The Mini Brake also bends metal roofing components and roof flashing including copper and aluminum.

Dual-direction, cam-over style clamps keep anvil secure in any position. This safety conscious feature prevents anvil from free falling or creating a pinching hazard.

Catalog Number	Description	Minimum Hem Bending Depth in. (mm)	Width. ft. (M)	Net Wt. lbs. (kg)

Pan Style MINI-BRAKE®

Goes wherever you need to work.

For fabricating shop-quality pans and boxes, on the job, the Malco 48 in. (1.2 m) "Pan Style" Mini-Brake quickly breaks down and goes to work with you!

Initial assembly requires only a few metric wrenches, and / or adjustables, plus one supplied hex wrench. The fully assembled MB48B "Pan-Style" Mini-Brake is designed to be portable. At just under 100 pounds (45 kg), it may be carried comfortably by two people, or quickly separated into anvil and table components for one-person transport.

Create bending widths from
2 to 48 (50.8 mm-1.2 m) inches!

MB48B

Finger Plate Widths: • (5) 2 in., 50.8 mm • (6) 3 in., 76.2 mm • (5) 4 in., 101.6 mm

When forming
pans and boxes,
remove & position
finger plates
as needed to
span widths.

MBL
Optional Leg Kit
(Sold separately)

Choose a combination of fingers that will span the bending width as close as possible. Adding space between fingers, when arranging combinations to accommodate fractional or uneven numbered pan or box side-width dimensions, will still produce an accurate bend. The anvil's clearance allows for a range of pan or box side-height dimensions from 1/2-inch (12.7 mm) to a maximum of 3-inches (76.2 mm).

Catalog Number	Description	Bend Angle	Max Bend Width	Min. Bend Width	Max Pan Height	Min. Pan Height	Min. Flange Net Wt.

Duct Stretchers

Straight / Offset / Locking

Use the Duct Stretcher to hold duct in place with one hand while slipping drive cleat in place with other hand. The low profile, straight body is designed to go anywhere, even in the tightest quarters. Additional spacing holes allow wheels to be adjusted to span greater distances. Rugged anodized aluminum body features large vinyl cushion grip and handy hang-up hole.

Straight and Offset Duct Stretchers

Model DS2 has the same unique features as model DS1 plus the angled bend of an offset handle to eliminate knuckle contact with metal.

Locking Duct Stretcher

Model DS3 locking duct stretcher pulls duct sections together and holds them in place while freeing both hands to align and install drive cleats.

The DS3 locks on from either side of duct connection. No need to adjust wheels! Simply place wheel located on moveable cam to one side of adjoining duct flanges. Turn handle downward to pull duct sections together and lock in place. Greater wheel clearance makes capturing the ends of duct sections, even misshapen flanges, easier than ever. The versatile shape of the DS3 frame also lets you hook and pull duct from above as the drive cleat is coaxed along the remainder of flanged track. The durable all steel frame extends beyond wheel edges, making it safe to push, hammer and bend drive cleats as necessary to complete installation. An offset handle design eliminates knuckle contact with work.

Step 1. Place wheel located on moveable cam to one side of adjoining duct flanges.

Step 2. Turn handle down to pull duct sections together and lock in place.

Pipe and Duct Holders

Holds Duct or Venting in place until properly secured.

Like an extra pair of hands, this job-site helper holds ductwork in place with clamps and a chain during installation until permanently secured. Temporarily suspending duct or venting from any joist is fast and easy. Double-ended keyhole also allows easy chain adjustment and locking in a horizontal clamping position, required for engineered joists, without the need to tie the chain around the clamp. Formed teeth hold the clamp securely in place on joist.

Double Ended Keyholes allow secure chain adjustment. Formed teeth hold clamp in place and secures chain in vertical or horizontal clamp position.

2DH

Holders also open wide and clamp securely for use on Engineered Wood Joists.

Holds duct in place, either between or under joists until properly secured.

CAUTION: 20 lbs (9 kg) Maximum Work Load
For use on Residential Lumber and / or Engineered I-Beam Construction Only.

Hand Held Folding Tools

Adjustable Folding Tool

Quickly adjusts from 1/4 in. (6.4 mm) to 1-1/2 in. (38.1 mm) folding depths

Model 9A Adjustable Folding Tool easily folds edges of aluminum siding, trim coil and lighter gauges of sheet metal up to 26 gauge (0.56 mm). The 9A quickly adjusts from 1/4 to 1-1/2 in. (6.4 mm to 38.1 mm) folding depths in 1/4 in. (6.4 mm) increments. The adjustment mechanism is completely hand operated; there are no loose parts or extra tools to contend with. A compact 3-1/4 x 9 in. (83 x 229 mm) size provides easy leverage for any folding depth.

The tool also features a handy hang hole for workbench applications, or stores easily in a tool box. The stainless steel construction assures long service life.

9A

Folds trim coil and aluminum siding. •
Folds galvanized sheet metal up to 26 gauge (0.56 mm).

Standard Folding Tools

Folding seams are formed from two steel halves, permanently joined together. Handy sight holes assure proper depth alignment.

3/8 in. (9.5 mm) and 1 in. (25.4 mm) folding depths with a 24-30 gauge capacity.

12F - 12 in. (30.5 cm) long tool is ideal for HVAC applications such as 3/8 in. (9.5 mm) folds for drive cleats and big 1 in. (25.4 mm) deep folds for joist panning, plenums, register boots, trunk line end caps and more.

12F

18F

Longer 18F - 18 in. (45.7 cm) tool assures a uniform fold.

24F

Extra long 24F - 24 in. (60.1 cm) tool may also be used as a mini brake by siding applicators.

Dampers

Hardware and Components

Malco 28 Gauge Dampers feature 1/4 in. (6.4 mm) bearings allowing bearing holes to be made in round duct with the use of a scratch awl. Squeeze pipe so that it is oval shaped. Insert damper into pre-punched bearing hole(s). Pipe will spring back to round when released. Secure with wing nut(s) provided. Damper may be adjusted with screwdriver or optional damper handle. Available with or without handles. *See below.*

Ratcheting Handle and Professional Kits

An impressive array of CONNEXT™ drive shaft combinations now includes Kits and a versatile Ratcheting Handle.

CONNEXT3
Ratcheting Handle

A forward or reverse ratchet driving mechanism, as well as the locked driving position of the CONNEXT Ratcheting Handle, meets torque capacity standards (including ANSI) comparable to a 1/2-inch solid shaft driver! The clear, molded acetate, full grip is shock-proof, shatter-proof and fluted to fit any hand. And a quick-connect holder mechanism accepts most 1/4-inch hex shank power drive or insert bits as a shaft including all Malco hollow, or magnetic hex chuck drivers.

Magnetic Hex Driver & Nut Driver Kits

Whole Kits of possibilities feature popular assortments of handles and hollow or magnetic hex chuck driver shafts in a tough Cordura Pouch with belt clip and Velcro closure.

Magnetic Hex & Hollow Nut Handles and Drivers

Sold together, each package includes both the Handle & Chuck Driver. The Connext difference is a quick-connect holder mechanism that accepts most 1/4-inch shank chuck drivers to any handle.

Magnetic Hex Hand Drivers with CONNEXT® standard & stubby handles

Precision-fit and hardened Malco Magnetic Hex Chuck Driver shaft components, offer the ultimate in Hex Hand Driver durability and flexibility. Insert shanks are available in 2-inch, 3-inch and 6-inch lengths.

Magnetic!

Hollow Nut Drivers with CONNEXT® standard handle

Hollow Hex Chuck Drivers with 1/4-inch power insert shanks are available in 3-inch and 6-inch lengths. All Malco Hex Chuck drivers are now COLOR CODED for easy size identification whether installed on a power drill or used with a CONNEXT™ Handle.

- #1 and #2 drivers available in 1-3/4 in. and 2-1/2 in. lengths

1/4 in. Hex Shank Power Bits

Quick Change Hex Adapter

Accepts 1/4 in. hex power bits. Installs into chuck of a standard 3/8 in. power drill. Hex power bits can then be inserted or removed instantly without a key, by retracting the adapter sleeve. Tempered steel. Black finish.

Magnetic Bit Holder for 1/4 in. Hex Shank Insert Bits

IMPACT GRADE 4 sizes! QUICK-CHANGE EXTENSION BITS

SECURE FIT

A Fast and Easy Push-in Style Receiver, with 3 Ball Bearing Detents holds any 1/4 -inch hex shank power groove or insert bit securely. Retract the collar only when removing bit.

IMPACT GRADE

Impact Grade Steel Construction make these durable extensions versatile for use with any Impact Driver or Malco CONNEXT Handle!

Do not combine extension bits. Doing so can result in damage to the tool or injury to user.

Cleanable, Reversible, Magnetic Hex Driver

This Double-Duty chuck driver with "Easy Clean Magnet," ensures that 1/4 in. & 5/16 in. hex drivers are always a flip away. With single piece strength, and an indestructible magnet, it's the Perfect System when paired with Legendary Malco Zip-in® and Bit-Tip® screws.

Our 2-EZ technology offers quick set-up, elimination of metal shavings and secure engagement with optimum Zip-in® and Bit-Tip® head height, to ensure that the hex washer head always seats flush without risk of damage to the driver magnet.

Impact Drivers

57

6 in 1 Reversible Driver

Combination bits change to drive 6 different head styles or sizes. 1/4 & 5/16 in. Hex opening nut driver with 3/16 & 9/32 in. slotted head bit and #1 & #2 phillips head bit.

Shank firmly locks into handle barrel. Driver bits are individual protected with black oxide. Shank is chrome plated to protect against rust.

Catalog Number	Description
RD6	Driver with 2 combination bits and 2 hex barrel openings

Step Drills

Drill hole sizes from 1/8 to 1 in. through sheet metal without burring, deforming stock or threading drill bit. A unique double flute design assures the penetration of soft or thin materials at the proper speed.

Malco Step Drills actually deburr as they drill. Perfect for use as a "hole-opening" reamer. They can also be used for making round holes from slots or intersecting holes. Made of industrial grade high speed steel. Malco Step Drills are heat treated and tempered to assure maximum strength for long wearing rugged use. *(Note: All sizes listed in inches).*

Catalog Number	Description	Depth Each Step (in.)	Elect. Drill Size (in.)	Pilot Hole Required (in.)
UB1	Drills 13 hole sizes from 1/8 to 1/2 in. diameter in 1/32 in. (0.79) increments.	1/8	3/8	No

UB11	Drills 11 hole sizes from 1/4 to 7/8 in. diameter for creating 1/2 in. knock outs.	N/A	3/8	No
UB20	Drills 8 hole sizes from 9/16 to 1 in. diameter in 1/16 in. increments.	1/8	3/8	1/2

Adjustable Sheet Metal Scribe

Measure, mark and scribe trim lines on sheet metal in one easy operation. Set desired trim depth on the 1/8 in. (3.2 mm) graduated scribe extension and tighten knob. The stop at the end of the scribe sleeve glides along edge of work as a 6 x 3/8 in. sheet metal screw point scribes a clean, hard line. Adjustable from 1/4 to 12-1/2 in. (6.4 to 318 mm) depths. Rotate the scribe extension and knob end to end for depths larger than 6-1/2 in. (165 mm). Includes two extra Zip-ins in handle for points.

Fast Adjusting Scribes

Accurate and fast adjusting. Two sizes for circles up to 32 in. (81 cm) and 42 in. (107 cm). Points are easily resharpened or replaced. Nickel plated steel body.

Expandable Trammel Points

Two sizes handle a variety of layout applications. The TR42 expands to a big 42 in. (107 cm) radius (84 in. diameter). The compact TR18 expands to 18 in. (46 cm) and stores in most tool boxes. All steel construction. Points are resharpenable and also replaceable. Telescoping arms are nickel plated to resist corrosion. Handle features a comfortable vinyl grip.

Carbide Tipped Scribe

Carbide Tipped Scribe Always a Sharp Point.

Solid carbide tip for scribing fine lines on hardened steel as well as glass, ceramics, plastics or sheet metal. Retractable tip is easily replaceable. Tool has handy pocket clip. Carbide tip assures long service.

Pocket Sized Sheet Metal Scribe

Scribe commonplace trim lines on galvanized sheet metal quickly and accurately. Ten pre-set scribing depths from 1/8 to 1 in. (3 to 25 mm). Each scribing depth size features a dual edged point to create clean, readable and accurate score lines parallel to the edge of the metal sheet. Corrosion resistant finish and etched-in dimensions are readable for life of tool.

Scratch Awls

Use to scribe lines on metal, plastic and a variety of other materials. Pierce holes in wood, plastic, leather, - even light gauge metal. Blades are high carbon, alloy tool steel fully polished to resist rust. Blade tapers to a fine point and may be resharpened many times. Easy-to-spot orange handles are shock and shatter resistant. Shallow fluted handles with large end bearing surface provide a sure, comfortable grip. User has choice of large diameter or regular grip handles.

Sheet Metal Hammers

One-Piece Steel

SH3
18 oz. (510 g.)

Leather Gripped Setting Hammer

Grip is protected with a durable lacquer coating. Leather conforms to hand over time. Easily, Malco's most popular setting hammer.

Most Popular!

Easily the most popular choice of sheet metal professionals worldwide, the Malco SH3 setting hammers leather grip conforms a permanent bond between the users hand for ultimate comfort and ease of use.

One-piece forged, I-beam construction. Full-polished heads with beveled face and pein are corrosion resistant. Hammer sections are individually hardened and tempered for strength and resiliency.

Leather Gripped Riveting Hammer

Grip is protected with a durable lacquer coating. Leather conforms to hand over time.

RH4
12 oz. (340 g.)

Vinyl Gripped Riveting Hammer

Molded-on vinyl grips minimize recoil and offer excellent comfort, non-slip gripping and durability.

RH4V

Dead Blow Hammer

Non-Marring • Non-Sparking • Non-Recoiling

One-piece construction of weather-resistant urethane compound ensures long service life. Excellent for working copper, other soft metals and auto body panels. Steel shot inside head absorbs impact to prevent recoil. Flanged handle butt provides a more secure grip.

DB1

16 oz. (454 g.)

One piece construction of weather resistant, urethane compound ensures long service life.

- Steel shot inside head absorbs impact to prevent recoil.
- Excellent for working copper, other soft metals and hardened sheet steel including ductwork and auto body panels.
- Flanged handle butt for a more secure grip.

Duct Ripper

Perfect companion tool to our TS1 metal cutting TurboShear!

Specially angled ground tip easily punctures and rips duct to the desired length starting hole. Hardened tip is ground on both sides to create 2 cutting edges for long, useful life. Cutting edges are aligned with shaft flats for large striking surfaces. Corrosion resistant blade, cushioned grip and a hang hole for storage complete this handy tool.

Rip Starter Hole

Insert TurboShear or metal cutting snip

CDR

Corrosion resistant blade, cushioned grip and a hang hole for storage complete this handy tool.

Hardened tip is ground on both sides to create 2 cutting edges for long, useful life. Cutting edges are aligned with shaft flats for large striking surfaces.

Punch Lock Metal Stud Crimper

Secures any width Stud and Runner without screws or other fasteners. • Powerful compound leverage design • Unique Punch and Die are easily replaceable • Maximum capacity 22 gauge stud and runner.

Compound leverage increases mechanical advantage nearly 7 to 1. Simply squeeze handles together with one hand while holding stud in place.

The PL1R Metal Stud Crimper features a unique punch and die shape that creates a rectangular crimp connection by bending over layered thicknesses of channel and stud at one time to form a sturdy bond without the use of fasteners. The crimp is always the proper strength and resists stress from any angle. The tool fits inside the smallest stud and runner. Handles spring back after making a crimp so that punch is back in a ready position to go on to the next stud or fastening point. Lightweight and compact size allows the user to work overhead with ease. The tool body consists of a strong, die-cast aluminum "C" frame head and rust-resistant, nickel plated steel handles and parts stampings. The long-life punch and die are formed from tool steel and are also easily replaced on the job.

The Malco PL1R Stud Crimper also features ergonomic RedLine Handle technology. An Engineered handle opening compliments the natural power stroke of any user's hand and maximizes the powerful 7:1 mechanical advantage of compound-leverage head to handle linkage. Comfortable handle grip contours, a non-slip grip insert, spring handle actuation and a thumb operated handle latch ensure a natural fit and feel for comfortable one hand operation anywhere on the job.

3-Station Edge Roller

Assures a uniform bend along the entire length of material

ER3

Outer rollers may travel off material and easily back on to complete bend because two roller stations can remain aligned on the edge of material.

Also adjusts for making curved bends. The center roller station is independently adjustable, with the outer roller stations retracted and locked, to allow for bending on a slight curve.

Quickly adjusts for making 5/8 to 4 in. (15.9 - 102 mm) bends in 29-22 gauge (0.36-0.76 mm) steel.

The center roller station of the ER3 Edge Roller features a precision English / Metric depth gauge on one shaft leg that, when locked in place at desired setting, accurately aligns the depth of all roller stations. Large, comfortable adjustment knobs hold depth setting securely.

High Leverage Drip Edge Folding Tools

For quick bends in standing seam metal roofing panels

Two models: 18-inch and improved 24-inch, match up with most flat-pan, standing seam panel widths.

A two-post-design, fiberglass reinforced nylon handle, makes bending maximum 22-ga. (0.76 mm) roofing metal easy, even when working overhead.

DEFT

DEFT1

1-1/2 in.
(38.1 mm)

1 in.
(25.4 mm)

Two rib-reinforced steel plates are permanently welded together to create strong folding seams for making 1-inch (25.4 mm) and 1-1/2-inch (38.1 mm) bends.

Compound Leverage Channel Shears

SRC24A

SRC24A

features a single installed die assembly with 3 channel sizes for cutting 1-5/8, 2-1/2 and 3-5/8 in. (41, 64, 92 mm) studs and matching runners.

SRC24A1 EV

features an installed die with 3 channel sizes for cutting 50, 70 and 92 mm studs and matching runners and an Extra Die for cutting 45, 64 and 95 mm studs and matching runners.

SRC24A2 SV

features an installed die with 3 channel sizes for cutting 51, 76 and 92 mm studs and matching runners and an Extra Die for cutting 45, 64 and 95 mm studs and matching runners.

Malco Channel Shears cut through metal studs and runners faster and more economically than any other tool on the market!

Malco Channel Shears complete cuts in one easy stroke without deforming metal channel. Die assembly assures that cutting action is clean and precise. Hollow ground hardened steel blade can be resharpened or replaced. A 36 in. (91 cm) long handle provides additional leverage making cutting with this shear almost effortless. Lightweight and portable enough to be where you want it, when you want it. Shears feature rugged all steel and bolt construction. Handle has comfortable red vinyl grips.

Replacement Blade (All 3 models)

10627 Field Replaceable: One replacement blade and two spacers.

1/8 in. (3.2 mm) Ceiling Grid Punch

Malco's unique Ceiling Grid Punch makes a clean 1/8 in. (3.2 mm) hole in up to three layers of 25 gauge (0.53 mm) ceiling grid.

The tool's slim but strong steel "C" frame allows easy access in tight corners and is ideal for punching through main tees and perimeter wall angle that is to be secured with rivets. A generous throat opening allows full operation from the edge of both standard 1 and 1/2 in. (25.4 and 12.7 mm) grid profiles. The Malco Ceiling Grid Punch features durable all steel construction and rust resistant nickel plate and black oxide finishes; the tool steel punch is easily replaceable. Lightweight, one hand operation, aided by compound leverage, helps assure a consistent professional quality installation. Ergonomic Redline Handles with unique one-hand operation latch offer maximum compound leverage performance and natural fit and feel.

Work overhead
and in tight corners!

1/8 - 3/16 in. (3.2 - 4.8 mm) Hole Punch

Does the work of more expensive bulkier punches faster and easier. Use in any edge application for making holes in window extrusions, metal ductwork or sheet stock.

Compound leverage increases one hand mechanical advantage 8 to 1. Spring return handles allow quick set-up for repetitive applications. Stop gauge permits adjustments from 1/4 to 1-1/8 in. (6.4 to 28.6 mm) depths from edge of material. Punch and die are easily replaceable or changed to another size. Punch and dies are constructed from high quality tool steel used in commercial high production punch press dies. Body of tool consists of lightweight, aluminum die cast 'C' frame and rust resistant nickel plated steel handles and parts. Ergonomic Redline Handles with unique one-hand operation latch offer maximum compound leverage performance and natural fit and feel.

Compound Handle
Leverage for maximum
ease of operation.

Easily interchangeable 1/8 in. (3.2 mm) and 3/16 in. (4.8 mm) punches and dies supplied with tool.

Reciprocating Saw Blades

Wood, Plaster, Metal & General Purpose

Reciprocating Saw Blades with BiMetal by Malco®

Reciprocating Saw Blades with BiMetal, stack up better! For wood with nails, metal pipe, angles, and a variety of specialty applications from drywall to drain pipe, BiMetal by Malco stacks up best against the rest. These shatter proof blades are formulated from a premium metal composition consisting of a High Speed Steel cutting edge micro welded to a flexible High Carbon Steel back. Wood Cutting BiMetal blades are available in a wide variety of profiles and tooth combinations to match cutting speed, plus control and maneuverability needed for the job. Wide 3/4 in. (19.1 mm) profiles on Metal Cutting BiMetal combine with superior manufacturing processes to outperform and outlast all other similar blades in head to head comparisons.

Catalog Number	Nominal L x W x Thickness in. (mm)	Teeth per inch (25.4 mm)	Tooth Set	Tooth Form	Cutting Edge	Description / Application
WOOD CUTTING BiMetal By Malco™						
 4DL6	6 x 5/8 x .050 (152 x 15.9 x 1.27)	6	Alternate	Standard	Milled	DELUXE CONTOUR 4DL6 used for rough-in, contours in wood with nails.
 4KH6	6 x 3/4 x .059 (152 x 19.1 x 1.50)	5/7	Alternate	Variable / Standard	Milled	KEYHOLE PROFILE -- VARIABLE PITCH Varied tooth sizes permit an overall coarser pitch for aggressive cutting in wood with nails.
 8KH7	9 x 3/4 x .049 (229 x 19.1 x 1.24)	5/7	Alternate	Variable / Standard	Milled	5/7 Variable Pitch teeth 4KH6, 8KH7, 12KH8 used for rough-in, mild contours in wood with nails.
 12KH8	12 x 3/4 x .049 (305 x 19.1 x 1.24)	5/7	Alternate	Variable / Standard	Milled	
 4KH8	6 x 3/4 x .049 (152 x 19.1 x 1.24)	8	Alternate	Standard	Milled	KEYHOLE PROFILE 4KH8 produces less vibration, smoother, cleaner cuts in wood with nails, composition board.
 4GT7	6 x 5/8 x .031 (152 x 15.9 x 0.79)	6	Alternate	Standard	Milled	STRAIGHT PROFILE 4GT7 used for smooth cutting in hard and soft wood, composition board.
WOOD CUTTING HCS (High Carbon Steel)						
 4S6*	6 x 5/8 x .050 (152 x 15.9 x 1.27)	6	Alternate	Standard	Milled	SUPREME CONTOUR - FLEAM SHARPENED Teeth are fleam sharpened (alternate ground set) for fast feeding, clean shearing action. 4S6 is fastest cutting blade for rough-in, contours in nail free wood. 4S8 used for rough-in, contours in nail free wood. *Blades available in standard 5 packs except where noted.
 4S8*	6 x 5/8 x .050 (152 x 15.9 x 1.27)	8	Alternate	Standard	Milled	
 4KH7	6 x 3/4 x .049 (152 x 19.1 x 1.24)	6	Alternate	Standard	Ground	KEYHOLE PROFILE - FLEAM SHARPENED Teeth are fleam sharpened (alternate ground set) for fast feeding, clean shearing action. 4KH7 used for rough-in, mild contours in nail free wood.
 12KH7	12 x 3/4 x .049 (305 x 19.1 x 1.24)	6	Alternate	Standard	Ground	KEYHOLE PROFILE 12KH7 used for rough-in, mild contours in nail free wood.
 8PWB	8 x 3/4 x .050 (203 x 19.1 x 1.27)	Progr.	Alternate	Variable / Progressive	Ground	PLUNGE CUT TIP - PROGRESSIVE PITCH Smaller teeth near blade shank and larger teeth at tip for faster cuts / longer life. 8PWB is a High Carbon Steel, PROGRESSIVE PITCH blade used for making fast, clean cuts in wood and composite material.
PLASTER BiMetal By Malco™						
 4P6	6 x 3/4 x .049 (152 x 19.1 x 1.24)	6	Alternate	"V"	Milled	STRAIGHT PROFILE - "V" TOOTH 60° angle "V" tooth cuts on both forward and backward stroke. 4P6 used for continuous cutting in plaster, sheetrock and metal lath.

Selecting the right blade for the job is critically important. Factors that should be considered are:

1. Type and hardness of material to be cut, which will determine the tooth form, thickness and material composition of the blade to be used.
2. Size and variation in cross section of stock to be cut which dictates the pitch of the teeth (or teeth per inch) required, tooth set and blade length.
3. Type of cut, whether straight, contour or both will determine blade width.

Snap Lock Punch

Ideal for crimping gutter end caps in place.

SL2R

Not recommended for heavy sheet metal.

Slide adjustment for throat depth allows settings from 1/4 to 5/8 in. (6 to 16 mm) depth. Easy one-hand operation. Ideal for crimping gutter end caps in place. Also creates locking tabs in light sheet metals for joining metal sheets or inserting into rolled edge of utility trim. Formed metal cutting jaws and handles are made of hardened stampings. Rust resistant nickel plate and black oxide finishes ensure long service life.

5 Blade Crimper

Produce a double crimp without deforming down-spout; walls stay square for a tight fitting, leakproof connection.

C4R

Use the Malco C4R Crimper to produce a crimp that downsizes corners of aluminum or steel downspout to create a male connection for joining downspout sections. The five blades of this versatile job-site hand tool produce a 1-1/4 inch (31.75 mm) long double crimp without deforming the downspout wall. This factory-like crimp ensures that the downspout wall stays square for a tight fitting, leak-proof connection. The connection is also more self-supporting during installation. A handle closing stop maintains a consistent crimp profile. Hardened all-steel construction and a nickel chrome finish ensure long service life.

Gutter Nail Driver

Working from Above

Working from Below

GND

Works anywhere to attach gutter to fascia with ease.

Use the Malco Gutter Nail Driver with hidden hangers and 8D galvanized nails to hang aluminum or steel gutters. A non-slip ergonomic grip provides multiple positions for grasping tool and working from above or below roof overhang. Durable 2-piece steel construction plus weather resistant zinc and nickel plating assure long service life of this professional quality tool.

Single Crimper

SC2

Light Duty tool without grips. Makes a single crimp for downsizing aluminum downspouts.

Extra-Long 6 in. Magnetic Screw Guide

GSG6 6 in. (152 mm)

- Impact Grade 6-inch long Power Drive with 4-1/2 inch Anodized Aluminum Sleeve provides extra reach without marring gutter.
- Holds and guides 1/4-inch Hex Head Screws up to 3-3/4 inches long.
- Easily works overhead.

Hardened steel 1/4 inch power groove hex shank works with drill or impact driver.

Aluminum sleeve guide ensures support for fast, accurate screw starts and stabilizes long screws during installation even at angles.

Magnetic!

Spring loaded magnet keeps hex head screw engaged and withstands repetitive shock from impact driver!

QUICK ACTION™

Gutter Outlet Saws

with Arbor and High Speed Pilot Drill

For downspout that always fits flush to gutter, choose from five different sizes of Malco fine toothed hole saws for safe, fast, clean cuts in thin walled and half round gutter. Combine these gutter saws with the combination Arbor and High Speed Pilot Drill for increased speed and production on the job-site!

GOSA1EV

Combination Arbor and High Speed Pilot Drill, with Compression Spring Collar, to automatically eject metal slug.

10 High Speed Steel Teeth
every 1 in. (25.4 mm)

**Clean cuts with
compression spring
ejection!**

For use with a 1/2-in (13 mm) cordless or corded electric drill and Malco Combination Arbor and High Speed Pilot Drill. High speed steel teeth set at 10 per-inch (25.4 mm) and a shallow 1-inch (25.4 mm) cutting depth ensure controlled cuts that will not grab or twist material even when cutting half round gutter (*below*).

This Combination Hole Saw Style Arbor and High Speed Steel Pilot Drill is specifically designed for use with Malco Gutter Outlet Saws. One universal threaded arbor quickly installs on any size Gutter Saw. The pilot drill bit projects only 7/16 in (11 mm) out of the shallow gutter saw cup to ensure controlled, safe engagement of saw teeth for hole cuts in K-style and half round gutter. A tapered compression spring collar on the drill bit automatically ejects the metal slug.

Gutter Outlet Punch

For cutting downspout drop holes in K-style aluminum gutter, nothing else matches the speed and accuracy of the Malco Gutter Outlet Punch System.

A versatile, lightweight Malco Tool Frame accepts your choice of separate Malco Rectangular and X-style Punch and Die combinations, including a 3 x 4-in. (76 x 102 mm) X-Style Punch and Die.

- Ejector built into Tool Frame safely removes metal slug from rectangular cuts.
- Punch blades are easily replaceable.
- Extra holes in base of Tool Frame allow for secure bench-mount operation.

Use the lightweight aluminum and steel tool frame and a punch and die of choice, to cut a clean drop hole anywhere along the length of standard 5 or 6-inch K-style aluminum gutter up to .032-in (0.81 mm) thickness. The tool frame features ample throat clearance and open sides to allow the punch access over the front edge of the gutter and quickly line up cuts in either direction (See Gutter Size Reference below). The tool frame's easy ratcheting mechanism, and angled blades of the punch, combine to provide smooth cutting action. A built-in ejector on the frame safely removes the metal slug from rectangular cuts. High carbon steel blades ensure long punch life, and the blades are also separately replaceable. Heat treated components and weather resistant

GOT

U.S. Patent No. 6,289,709

finishes on both the tool frame and all punch and die assemblies ensure long service life. Fastener holes are provided in the tool base for bench-mount operation.

Tool Frame allows punch access over the front edge of the gutter to quickly line up cuts in either "A" or "B" direction.

4K Gutter - 2 x 3, 2 x 3 X-Style, 3 x 4, 3 x 4 X-Style

5K Gutter - 3 x 4, 3 x 4 X-Style

6K Gutter - 3 x 4, 3 x 4 X-Style

Blind Rivets

Steel, Aluminum, Stainless, Copper, Painted & Washers

Malco Blind Rivets provide a strong, secure connection between 2 or more sheets of material, that will not loosen with vibration. Blind rivet fasteners can be used where access is limited to only one side of the material to be fastened. Rivets require only a pre-drilled or pre-punched hole. The blind rivet is an assembly, consisting of a mandrel and an eyelet body. Mandrels are used only to set the rivet body and are then discarded. Mandrel is designed to break-off at the crimp after pulling (setting) the rivet body. No operator skill is required to set blind rivets. Low rivet profile offers cosmetic advantages over screws.

Note: Package sizes available in
Bulks, Tubs (T), Boxes (X) and Bags (G).

2-in-1 Hand Riveter

2IN1

One hand operation with normal squeezing action provides enough pulling power to set all popular size rivets. 2-in-1 adjustment features a single long stroke for most hand riveting applications and a short "ratchet action" power stroke for setting larger diameter rivets. Outside jaw-grip adjustment wheel opens and closes jaws with fingertip ease to fit any size mandrel and to obtain maximum stroke efficiency.

Professional slim nose allows 2-in-1 to go where other hand riveters cannot. Ideal for reaching into corners and recessed areas. Three nosepieces 1/8, 5/32, and 3/16 in., included with tool. Nosepieces are stored in handle. Heavy duty all steel construction insures long life and minimum wear. Polished finish, nickel-chrome plated. Red vinyl cushion grip and hand stop.

Economy Hand Riveter

CR18

Lightweight, compact size and slim nose projection allows this riveter to go wherever the work is. Four rivet nosepieces: 3/32, 1/8, 5/32 and 3/16 in. store in handle. Ideally suited for blind riveting applications in aluminum windows, gutter and downspout. Not for use with 5/32 in. or 3/16 in. steel rivets (steel rivets larger than 3.2 mm). Spring return handles and comfortable contour grip make operation fast and easy. Just open handles and insert rivet into tool until flange touches nosepiece. Squeeze handles slightly to allow jaws to grip rivet mandrel. Insert rivet into pre-drilled work to be fastened and squeeze handles until mandrel snaps. Release grip on handles and mandrel will drop out front end of tool when tilted. Rugged steel construction with black paint finish and comfortable vinyl grip. Secure handle latch makes this tool easy to fit in pouch or pocket.

Metal Cutting Saw Blade

Cool Clean Cuts in metal roofing & metal building panels

Standing Seam Metal Roofing

MCCB7

Metal Building Panels

Specially formulated, tough c-6 carbide tipped blade fits all popular brands of portable circular saws. Lasts up to 30 times longer than abrasive disks for cutting unhardened ferrous metal. Makes true, flat cuts in standing seam metal roofing and metal building panels without burning paint or protective coatings. Also makes clean cuts in metal studs, light angle iron and thin walled pipe.

Flaring Tool

FT195

Bar Clamp Type Flaring Tool

Flares 7 sizes of soft copper, aluminum and brass tubing. Forged steel slip-on yoke and hardened flaring bar. Yoke design permits flaring where there is little space between nut and tube end. Positive clamping of bars prevents tube slippage. Hard chrome-finished swivel-type cone makes better flares with less effort. Satin finish nickel-chrome plated. *Conforms to federal specification GGG-G-451a, 6-13-68, Type II, Class II, Style A.*

Die Block Type

FT500

For soft copper, aluminum & brass tubing

Faceted, hard chrome finished cone rolls out perfect 45° flares - then automatically burnishes flare face. Handy slip-on yoke permits use in tight quarters. Movable dies allow tubing to be slipped in easily. Heat treated dies grip tubing without scoring and the original tube wall thickness is maintained at base of flare. Satin chrome and black nickel finish.

De-burring Tool

R308

Pocket Size, swivel reamer

Pocket size reamer deburrs nominal 1/4 in. (6.4 mm) or larger tubing and fittings. Freely rotating, hardened steel blade holds its edge in both copper and ABS/PVC plastic. Under 6 in. (152 mm) overall length.

Swaging Punches

ST94

ST96

Combination Swaging Punches

Model No. ST94 features three sizes in one tool. (Knurled stock for easy removal of punch.) Model No. ST96 features six sizes in one tool.

Fitting Brushes

For use with copper tubing

Carbon steel crimped fill handle and stem. Available in 3 different sizes.

Fiberglass Duct Essentials

**Fiberglass Duct Fabrication
has never been easier**

Master the Art of Fiberglass Duct

- Original Tie Tensioning Tools
- FasGroov Kits • Hole Cutter
- Squares and Knives

Tie Tensioning Tools

Non-Slip Manual Tie Tensioning Tools

These rugged lever action cut-off tensioning tie tools feature a unique notched gripper.

A clean black baked on enamel wrinkle finish will also weather the elements and stand up to abuse on-the-job. Comfortable handles reduce the pinch point area, and gray vinyl cushion grips are available on the model TY4G. Works on all ties including thin designs.

U.S. Patent No. 5,048,575

TY4G

TY4

Cutter Handles

Use Malco adjustable nylon ties to install flexible duct to take-offs, or secure bundles, up to 15 in. (3.81 cm) diameter. Made of 100% nylon, Malco ties offer a minimal tensile strength of 175 pounds.

Adjustable Tie Tensioning Tool

High leverage tensioning tool with auto cut-off, for continuous use on-the-job. The TY6 Tensioning Tool is designed for a heavy user of nylon ties. An adjustment knob allows installer to set desired tension for securing flex duct to a take-off collar. When the tie is tight, a breakaway spring mechanism releases the tool's lower handle, causing the blade to engage and automatically flush cut off the excess tail of the nylon tie. No extra operation for manual trimming is required. Nylon tie installation is fast and easy with the TY6. Works on all ties including thin designs.

Operating the TY6 is easy on the installer too! Contoured handles, with stops, are easier to grasp. Also, smooth lever action and vinyl cushion grips minimize hand and arm fatigue on big jobs.

The TY6 features a hardened steel body, long wearing parts, and a weather resistant nickel chrome finish to assure many years of dependable service.

All Malco Tie Tools are designed to work on standard 175 lb. (778 N) ties as well as thinner 125 lb. (556 N) ties.

Tensioning Adjustment knob and automatic cut-off mechanism Turn Adjustment knob clockwise to increase tension and counter clockwise to decrease tension.

CAUTION: Do not over tighten adjustment knob with fingers. Adjust knob only with fingers to avoid breaking ties before cut-off occurs.

Features hardened steel stampings with weather resistant nickel chrome finish.

TY6

*Vinyl cushion grips with hand stops
U.S. Patent No. 5,048,575*

AUTO-CUT-OFF with Non-Slip, Notched Gripper:
For continuous use on thick ties. Breakaway spring mechanism automatically engages cut-off blade at desired tension setting.

FasGroov

Ductboard Fabrication

Complete solutions for Fiberglass Duct

Lay out ductboard as you cut with a FasGroov® Kit. Available in kits and single tools for professional fabrication of all brands of 1-in. (25.4 mm) or 1-1/2 in. (38.1 mm) ductboard.

FasGroov Knives

Safer to use with comfortable molded handles. Male and Female Shiplap Knives for 1 in. (25.4 mm) and 1-1/2 in. (38.1 mm) ductboard can be used on closed duct sections. Duct Knife features a rounded scoring edge to cut fiberglass without tearing skin. Plus, Malco's FG1 Hole Cutter and a special 1-1/2 in. (38.1 mm) blade No. KBHC are available separately for creating flex duct take-offs.

FasGroov Hand Tools

Anodized aluminum sled-style tools for 1 in. (25.4 mm) and 1-1/2 in. (38.1 mm) ductboard.

Grooved Sled bottom for easy sliding.

Easy Blade Removal

Ergonomic molded handles reduce fatigue

Easy turn-the-knob blade height adjustment

FasGroov Square

Easy-to-use, easy-to-adjust anodized aluminum square.

1. Adjustable "Finger" Clip allows user to finish cut accurately while arm is fully extended.
2. Five position Angle Arm Handle accommodates user's reach and holds square in alignment.
3. Adjustment slot for additional angles
4. Adjustment Pivot Knob

Flex Duct Support

Flexible duct is often susceptible to kinks and sags that restrict air flow. The FDS1 Flexible Duct Support eliminates air flow restrictions and increases efficiency to dramatically reduce utility bills and improve heated or air-conditioned room comfort. A properly supported 90° duct elbow typically improves air flow efficiency 10 to 40%. A Malco Duct Support quickly installs on new or existing flexible duct. The versatile FDS1 design uses either 36 or 48 inch nylon cable/zip ties to accommodate 4 inch to 16 inch diameters of flexible fiberglass wool duct as well as un-insulated flexible duct. And the strong, but lightweight, 100% recycled polymer support will not weigh down ducting. UL Classified 2043 and GreenSpec Listed.

Catalog Number	Description	(Tie Requirements per Duct Diameter) Duct Diameter	Number of Ties	Nominal Dimensions in. (cm)	Net Wt. oz. (g)
FDS1	Flexible Duct Support	4-10 in. (10.2-25.4 cm) 12-14 in. (30.5-35.6 cm) 16 in. (40.6 cm)	2) 36 in. (91.4 cm) 2) 48 in. (121.9 cm) 4) 36 in. (91.4 cm)	15 x 11-1/4 x 3 (38.1 x 28.6 x 7.6)	3 (85)

Flex Duct Cutter

U.S. Patent No. 5,225,237

Wire Cutter

Built-in wire cutter lets you finish the job you started with just one tool! Double edged blade cleanly pierces through outer skin and insulation. Cuts from either direction around entire circumference of duct. Fine honed blade is long lasting stainless steel. Wire cutter cuts hardened wire rib coil. Compound leverage, for easy wire cutting. Comfortable, non-slip vinyl gripped handles.

FDSH Universal Flex Duct Knife Sheath

- 2-3/4 in. (70 mm)
- Wide Belt Loop
- Velcro Safety Strap
- Easily fits DK6S Malco Duct Knife and Duct Tools FDC1, FDC2 and FDC3

High Density Polyethylene insert prevents knife tip from puncturing through nylon.

Catalog Number	Description	Blades / Wire Cutter	Variable Leverage Ratio (High / Low) throughout stroke	Length of Cut in. (mm)	Length in. (mm)	Net Wt. oz. (g)
FDC1	Flex Duct Cutter	High Carbon Steel	10.4 to 1.0 - 11.9 to 1.0 (Wire Cutter)	4 (102)	11-7/8 (302)	11 (312)

Catalog Number	Description	Length in. (mm)	Net Wt. oz. (g)
FDSH	Universal Flex Duct Knife Sheath	13.5 (343)	2.48 (70.3)

Flex Duct Shear

Smooth scissor action!

Thumb operated latch ensures that sharpened blade edges on the FDC2 stay closed when not in use.

Cuts insulated flexible round duct and also cuts the duct liner's wire rib coil. Pointed bottom blade easily pierces duct to start cut. Heavy duty wire cutter is located away from scissor blades. Thumb operated latch ensures that sharpened blade edges stay closed when not in use.

Multi-Purpose Shear

Trim flex duct and tighten nylon ties with one tool!

FDSH Universal Flex Duct Knife Sheath

- 2-3/4 in. (70 mm) Wide Belt Loop
- Velcro Safety Strap
- Easily fits DK6S Malco Duct Knife and Duct Tools FDC1, FDC2 and FDC3

High Density Polyethylene insert prevents knife tip from puncturing through nylon.

The versatile FDC3 Flex Duct Tool is actually three tools in one! The finely honed double-edged knife blade cleanly pierces through the outer skin, insulation and liner construction of flexible round duct and cuts in either direction. A thumb-operated latch opens the tool's compound-leverage handles and the jaws of a built-in wire cutter to easily sever the exposed wire rib coil of duct liner. Use the tool's tie-tensioning mechanism to install a nylon tie strap and secure the flex duct take-off collar. With the handles of the FDC3 in the open position, a nylon tie can be threaded through the mechanism and then tightened by gently pumping the tool's handles. Use the wire cutter to trim excess tie strap tail. Trimming and installing flexible round duct is now as easy as one-two-three with Malco's FDC3 multi-purpose Flex Duct Tool.

FG1

Hole Cutter for Fiberglass Ductboard

Makes precise holes in ductboard for flex duct take-offs. Supplied with standard double point utility knife blade for cutting 1 inch (25.4 mm) board. Use KBHC blade for 1-1/2 in. (38.1 mm) ductboard. Cuts 4 to 20 in. (102 to 508 mm) diameter holes in fiberglass ductboard. Operation is fast and easy. Cutter rotates counter clockwise on a center pivot punch. Durable extruded aluminum frame and engineering grade molded plastic and nylon components. Blade holder stores in body for safety and to protect blade from damage when not in use.

Siding Removal Tool for Vinyl Siding

SideSwiper model SRT2 combines the comfort and added leverage of an easy-to-grasp straight handle with the smooth unlocking motion of a burr free hook. The blade of the SRT2 is angled from the bottom plane of the handle and allows the user to keep the wrist straight while keeping knuckles well above the work. Blade surface finishing and plating assures that the sharply angled hook will not cut into the vinyl material or produce shavings. Additional comfort and control is achieved with a non-slip textured handle grip. The gripping surface will not become slick from moisture, and the form fitting, plastisol dip process bonds the grip for the life of the tool.

Durable one piece spring steel construction is virtually indestructible. A handy oversize hang hole in handle accommodates a 1/4 in. (6.4 mm) peg hook.

Save Time!
With a smooth unlocking motion, an easy-to-grasp straight handle and a non-slip textured grip; this handy tool will save you time by cleanly removing vinyl siding!

- INSERTION:** Wedge tip of blade under overlapping panel and hook onto the back lip of buttlock.
- UNLOCKING:** Pulling lip downward, slide the tool along length of panel to unlock and expose nail row of panel to be removed.
- PANEL REPLACEMENT:** Lock and nail replacement panel into place. Use tool to relock overlapping panel. Pull down on panel lip and press it into lock of replacement panel below.

The Sider Marking & Cutting Templates for Vinyl Siding

Save up to 3 profitable hours on each job with the innovative Sider. It works quickly and accurately, replacing chalk lines, squares and straight edges. Use it as a scribe or square to mark or score precise lines. Or go straight to cutting with your utility knife in the precisely marked 1/8 in. (3.2 mm) holes. The Sider comes in 3 sizes to match popular siding profiles and features durable 18-gauge (1.22 mm) stainless steel construction. It's one smart little tool for even the biggest siding jobs.

THE SIDER

Snap Lock Punch

Snap lock plastic skirting and siding to finishing trim.

Snap lock plastic skirting and siding to finishing trim. Makes tabs in the cut edge of siding panel used as a finishing course at top of wall or below window. Tabs lock into utility trim.

Punch raises a high projection to compensate for natural relaxation of vinyl plastic. It also works well on aluminum siding but is not recommended for steel.

SL5

Economical and Rugged

Note: The SL5 should not be used when PERMATABS are required to snap into finished trim. For this application we recommend using the Malco SL1R or SL2R Snap Lock Punch. PERMATABS is a trademark of C & H Enterprises. Not Recommended for use below 32° F (0° C).

Snap Lock Punch

Designed for Vinyl Only

SL8R

Nail Hole Slot Punch

NHP1R

For securing vinyl skirting and siding to finishing trim.

The SL8R produces wider, more secure locking tab projections. Tabs grip a greater surface area and guard against dislodging due to relaxation of vinyl from heat. SL8R installations also resist blowout during times of high pressure and wind. Constructed of steel stampings and rugged investment cast alloy steel jaws, with nickel plate and black oxide finishes. Ergonomic Redline Handles with unique one-hand operation latch offer maximum compound leverage performance and natural fit and feel. *Not Recommended for use below 32° F (0° C).*

Add accurate nail slots fast and easy!

The NHP1R punches a generous 5/32 x 3/4 in. (4.0 to 19.1 mm) horizontal slot for adding or elongating nail holes in vinyl and .019 in. (0.48 mm) aluminum siding to accommodate irregular stud spacing. Ergonomic Redline Handles with unique one-hand operation latch offer maximum compound leverage performance and natural fit and feel.

J-Channel Cutters for Notches & Drain Tabs

J-Channel Cutters are available for 1/2, 5/8 and 3/4 in. (12.7, 15.9 and 19.1 mm) channel.

Use a versatile Malco J-Channel Cutter to make drain tabs, downstream notch cutouts and miter trim cuts in vinyl channel. Available in three sizes for 1/2 inch (12.7 mm) channel, 5/8 inch (15.9 mm) channel and 3/4 inch (19.1 mm) channel. Tool operation is fast and easy! Light hand pressure produces a single handle click signal to ensure perfect drain tabs every time. Graduations on the upper jaw easily gauge tab or notch depths from 3/8 to 1-1/4 in. (9.5 – 31.2 mm). Use either side of the jaws to cut a 45-degree miter for a professional finished look. Hardened all-steel construction with rust resistant nickel chrome and black oxide finishes ensures long service life.

45° trim cut

Depth Gauge

Use graduations on jaw to gauge cutting depths of 3/8 to 1-1/4 in. (9.5 to 31.2 mm)

Replacement Spring for Hand Tools

5018 Fits All JCC Models on this Page

Vinyl Cutting Circular Saw Blades

VCB1

Versatile 7-1/4 in. (184 mm) blade for smooth cutting in vinyl fencing / siding and plastic trim.

VCB2EV

Big 10 in. (250 mm) circular blade fits most power miters for making ultra smooth cuts.

Trim Nail Punches

Drive trim nails into soffit, fascia and other finishing trim without denting or marring material.

All-steel nose and aluminum tail piece directs weight of this punch to the working end when grasping or starting a nail. Accommodates up to 1-1/4 in. (31.2 mm) standard trim nails. Nose fits into 1/2 in. (12.7 mm) J channel.

Avoid the awkwardness and strain of balancing nails in the nose of the punch or holding back the drive pin while standing on a ladder or reaching out to nail. The new retaining clip also minimizes scrapes and dents caused by nail slippage or improper setting depth.

Nail Retaining Clip Holds nail securely while positioning punch.

- Hole Saws and Fiber Cement Saw Blades*

Fiber Cement Siding Angle Cutter

Cut multiple angles in Fiber Cement Siding with Guillotine Precision and Minimal Dust!

Quickly & Cleanly Produce (3/12, 4/12, 6/12, 8/12, 10/12 or 12/12) pitch cuts and most other angles, in fiber cement siding.

Stable welded frame will survive the most rugged job-site environments.

◀ Long-life nickel plated blade design with high leverage handle requires less force to produce clean cuts and minimal air-borne dust.

FCC7

Large guillotine work plate and open throat allows clearance for cutting any angle in 5/16 in. (8 mm) fiber cement planks up to 12 in. (305 mm) wide.

Fold-out feet act as support extensions for the cutting operation and also allow guillotine to be mounted on saw horses for optional workbench-level operation.

A 90° guillotine fence is quickly installed to the left or right of blade for cutting siding planks to length.

Loosen knob to swing fence out of the way for angled cuts.

Smooth straight cuts

Cleanly cut any angle desired

Catalog Number	Description	Net Wt. lbs. (kg)
FCC7	Fiber Cement Angle Cutter	45 (20.4)

Scribe desired angle on fiber cement siding plank and feed it into the guillotine blade as you cut.

Fiber Cement Siding Overlap Gauges

- Allows 1-person installation of siding planks.
- Two gauges support entire length of plank and precisely gauge a standard 1-1/4 in. (31.2 mm) overlap - even on a bowed wall.
- No adjustments to vary and nothing to mark.
- Works on 5/16 in. (7.9 mm) fiber cement siding plank.
- Will not mar finish of pre-painted siding.

← Precision-ground tip assures gauge will grip behind siding plank.
Strong, one-piece tempered spring steel construction.

FCG2
(1 Pair)

U.S. Patent No. D525,492

Place pair of gauges on top edge of lower plank as shown. Rest upper plank against outside face of the gauge stop to accurately space planks, and then nail upper plank approximately 18 in. (46 cm) away from gauge.

Depress thumb tab to allow plank to snap flush to wall and gauge.

Remove gauge by depressing thumb tab again and lifting gauge up and off lower plank, then pulling gauge out from under top plank.

Fiber Cement Siding Facing Gauge

- Adjustable for precise 5, 6, 7 or 8 in. (127, 152, 178 or 203 mm) exposures. Gauging block easily snaps into desired position without use of tools or fasteners.
- Easy to grasp with one hand while steadying new plank for nailing.
- Manufactured of tough, long-lasting, weather-resistant nylon material throughout.
- May be used with Overlap Gauge for 1-person application.

FCFG

Speed Set Gauges

Using the Facing Gauge while nailing across the width of the plank assures greater accuracy of the desired exposure and guards against sagging. The Malco Overlap Gauge is used here like an extra pair of hands to prop up one end of the plank for one-person application.

Malco... by EDMA

Fiber Cement Siding Guillotine Shear

Cleanly cuts 5/16 in. (8 mm) fiber cement siding without distortion or compression. A large, stable support plate, with board stop, ensures straight, square cuts in 8-1/4 in. (210 mm) wide plank with minimal dust. No sharpening required! The durable, lightweight steel frame and high leverage design offer long service life, easy handling and smooth cutting operation.

Fast, Straight Trim Cuts

Minimal Dust Operation

Fiber Cement Siding Circular Saw Blades with Carbide Tips

For repetitive cuts in fiber cement with power miters or portable circular saws, Malco now offers specialized Circular Saw Blades with PCD (PolyCrystalline Diamond) faced carbide tips for longer life. A lower number of teeth and deeper gullets produce cleaner, more precise cuts resulting in an accurately matched trim edge and tighter seams. Perfectly tensioned, hardened tool-steel blade assures a flat true run.

Designed for repetitive cuts in fiber cement with power miters or portable circular saws, these specialized Circular Saw Blades with PCD (PolyCrystalline Diamond) faced carbide tips ensure long service life.

Available in:

7-1/4 in. (184 mm) 4-tooth, 10 in. (254 mm) 6-tooth and 12 in. (305 mm) 8-tooth configurations for use with the full range of circular saw equipment.

A lower number of teeth and deeper gullets produce cleaner, more precise cuts resulting in an accurately matched trim edge and tighter seams. Perfectly tensioned, hardened tool-steel blade assures a flat true run.

FCCB7

FCCB10

FCCB12

Hand Nibblers for Fiber Cement & Backerboard

Anti-Slip blade profile.

Makes fine, precise trim cuts & rounded cuts with ease.

FCC3 / FCC5

Malco... by EDMA

(FCC3) Cuts 5/16 in. (8 mm) fiber cement siding & (FCC5) cuts 1/2 in. (12.7 mm) backerboard planks cleanly, without distortion or blowout. Makes fine, precise trim cuts and rounded cuts with ease. Anti-slip blade profile offers exceptional operator control.

WARNING: Fiber Cement contains crystalline silica. Respirable silica contained in cutting dust is known to cause cancer.

Hidden Nail Cutter

The easiest way to cut hidden nails

Cuts hidden nails left over from removal of damaged or unwanted fiber cement siding plank without damaging overlapping plank. Flat head with beveled leading edge easily maneuvers under edge of siding and into corners. Ideal for remodeling or salvaging projects.

SNC

- Saves time and effort when replacing or salvaging siding, thin building materials and windows.
- Flat head with beveled edges easily maneuvers under edge of material & reaches into corners to cut hidden nails without damaging material.
- Precision-ground, heat treated jaws and compound handle leverage combine to cut up to 16D common nails with a low force requirement.

Fiber Cement Snip

Capable of cutting down to a 2 in. (50.8 mm) circle.

Capable of trimming 1/8 in. (3.2 mm) from edge of 5/16-in. (7.9 mm) siding plank.

Designed to cut 5/16-inch (7.9 mm) fiber cement siding plank, the FCSR Snip makes precise arc and trim cuts from any work position fast and easy. Hardened all-steel construction with rust-resistant nickel plate and black oxide finishes ensures long service life.

QUICK ACTION™ Carbide Tipped Hole Saws

and Accessories

Easily cut thick or layered building materials including wood, wall tile, fiberglass, plastic and fiber cement siding including James Hardie®

- Quick Change Pilot Drills with a tight, gripping hex shank are available in both **High Speed Steel** and **Carbide Tipped**.
- Unique Quick Connect Arbor easily attaches both pilot drill & hole saw quickly and securely.
- 19 separate Hole Saws work fast with Carbide Tipped Teeth featuring self cleaning deep gullets.

Pilot Drill projects 1 in. (25 mm) past saw teeth for easy cutting in uneven surfaces like lap siding for easy saw plug ejection.

Hole in One[®] HOLE SAW

A hole saw supplied with a dedicated arbor is always the right match, properly assembled and ready to use. BiMetal by Malco concentric construction ensures vibration-free cuts in any machinable metal, including tool steels and stainless. A variable 4/6 pitched tooth configuration milled into a high speed steel edge and micro-welded to a shatterproof alloy steel body easily tackles nail embedded wood. And a generous 1-15/16-inch (49.2 mm) cup depth allows cuts in wooden studs, joists and door slabs in one pass.

- Shatter Proof
- High-Speed Steel

Bimetal hole saw with supplied arbor easily cuts metal, nail embedded wood, studs, joists and door slabs.

High speed 1/4-inch (6.4 mm) replacement pilot drill bit fits both original Hole-in-One hole saw with built-in arbor and current 2-piece Hole-in-One with dedicated separate arbor. Generous 3-sided, 1-13/16-inch (30.2 mm) long flats ensure easy positioning of replacement pilot drill bit in the pass-through shank of original welded-on arbor and positive connection with arbor cap screw of either original or current arbor.

HSX	13 in. (330 mm) Arbor Extension fits Malco Vent Saw [®]			

Designed for cutting all types of hard and soft wood, and other non-ferrous materials including plywood, composition board and siding. The Malco VENT SAW[®] is indispensable when fitting fresh air intakes through foundation plates, exterior siding or facing materials encountered in residential or light commercial installations of gas or oil fired furnaces. VENT SAW[™] features easily replaceable alloy steel blades and a versatile one piece cast aluminum arbor/mandrel combination with a 7/16 in. (11.1 mm) pilot drill. The webbed mandrel allows easy plug removal and a built-in arbor eliminates the need for separate arbor attachments.

SmartTool & SmartClip Fastening System

for fast, uniform layout of PEX to a wire grid with foamboard base

Easy top-loading SmartClip magazine

Use the Smart Tool standing comfortably

Smart Clip is designed for a secure wire connection

Protective plastic-to-plastic PEX connections

Uniform layout ensures even radiant heating surface.

80% Faster - 100% Smarter

The easy-to-use, top-loading SmartTool stapler is used to install SmartClip staples that secure an in-floor radiant heating layout of PEX tubing to a wire grid with foamboard base. The ergonomic 38-1/2-inch (98 cm) tall SmartTool weighs only 6.1-lbs (2.8 kg) and saves time, as well as the user's back and knees, by operating from a standing position to attach SmartClips to a 10-ga (3.5 mm) wire grid. A large capacity magazine holds over 40 SmartClips (two loading strips) for uninterrupted, smooth, one-stroke stapling. The installed SmartClips accommodate popular 1/2 inch PEX tubing, which the user also installs from a standing position by pressing into place with one foot while distributing the PEX along the clip layout. The plastic-to-plastic, SmartClip-to-PEX connection eliminates risk of clip corrosion or abrasion of PEX. The SmartClip keeps the inserted PEX elevated over the wire grid to provide thorough concrete encasement and coverage. The resulting straighter, more accurate PEX layout placement on the wire grid ensures even distribution of in-floor heating.

SM2 SmartClips

Catalog Number	Description	Tool Length in. (cm)	Handle Width in. (cm)	Wire Capacity Ga. (mm)	SmartTool Clip Maximum	PEX Capacity in. (mm)	Tool Net Weight lbs. (kg)	Quantity

PEX Tubing Uncoiler

Organize and dispense PEX Tubing easily and efficiently for a more uniform layout

Use for hydronic in-floor radiant heating layout and for running potable tubing. The open case serves as the unit's base. No tools are required to assemble. A heavy-duty turntable supports a full coil of PEX (polyethylene cross-linked tubing). Eyelet loop opens for easy feeding or removal of tubing from Uncoiler unit. Rotating eyelet arm allows tubing to be pulled off in any direction. Factory-adjusted tension prevents backlash and spreading of tubing coil off the turntable.

Accommodates all types of PEX tubing:
1000 ft. (305 m) of 3/8 to 1/2 in. (9.5 to 12.7 mm)
500 ft. (152 m) of 5/8 to 1 in. (15.9 to 25.4 mm)

Fast Set-Up, Easy Loading and Dispensing.

1000 ft. (305 m) x 1/2 in. (12.7 mm)

500 ft. (152 m) x 1 in. (25.4 mm)

EASY STEP BY STEP ASSEMBLY

An optional Wheel and Handle Kit is also available.

PEX to Wire Tool

The Lowest Cost Per Connection, for laying out a PEX in-floor radiant heating system on a wire grid.

A fast, easy, labor-saving way to lay out an in-floor radiant heating system on a wire grid! The PT1 Tool secures PEX (polyethylene cross-linked tubing) to a wire grid with proprietary Malco PC1 Clips. The tool's 25-clip capacity magazine and smooth stapling mechanism quickly feeds and installs the 12-gauge (2.5 mm) wire clip with a single one-handed pump of the handles. The secured clip allows adequate movement to avoid abrasion of the PEX tubing. Hardened all-steel construction with rust resistant nickel plate and black oxide finishes ensures long service life.

The Malco PT1 PEX To Wire Tool also features ergonomic RedLine Handle technology. An Engineered handle opening compliments the natural power stroke of any user's hand and maximizes the powerful 7:1 mechanical advantage of compound-leverage head to handle linkage. Comfortable handle grip contours, a non-slip grip insert, spring handle actuation and a thumb-operated handle latch ensure a natural fit and feel for comfortable one hand operation anywhere on the job.

Safe to use on all PEX to wire applications and all brands of PEX tubing from 3/8 in. (9 mm) to 5/8 in. (15.9 mm) diameters.

- Easy-loading magazine with 25 clip capacity won't slow you down.
- Trouble FREE tool operation and secure clip connection.
- 12-gauge (2.5 mm) clips will not jam, break or damage PEX.
- Clip connection allows some PEX movement to avoid abrasion.

Hard or Soft Copper

- Spare Cutting Wheel Included
- Ball Bearing Feed • Flare Cut-Off Groove
- Retractable Reamer

For hard or soft copper tubing. Makes clean, right-angle cuts with no burrs or chips to clog tubing. Features ball bearing feed, flare cut-off groove, retractable reamer and spare cutting wheel. Rugged aluminum alloy body is designed for handling ease.

Ratchet Action

Self-Feeding Ratchet Motion

Self feeding ratchet motion for easy cutting in close quarters. Cuts copper, brass and aluminum tubing as well as thin walled conduit.

Spring Loaded

Fast Adjusting with Quick Release

Fast Adjusting with quick-open release after cutting. Cuts copper, brass and aluminum tubing as well as thin walled conduit.

Tight Spaces

1-1/4 in. Clearance for tight spaces

A handy tube cutter for cramped spaces so often encountered on installations or repairs. Only 1-11/16 x 1-15/16 x 7/8 in. (42.9 x 49.2 x 22.2 mm). Weighs only 2-1/2 oz. (71 g) A mere 1-1/4 in. (31.8 mm) clearance is all that is needed to operate the "Imp".

Double Rollers

Tubing pivots on double rollers.

Compact cutter requires only 1-15/16 in. clearance, yet accommodates tubing from 3/8 to 1-1/8 in. (9.5 to 28.6 mm) O.D. (1/4 to 1 in. Nominal). Cuts copper, aluminum or brass, thin wall tubing. Lightweight aluminum alloy body. Spare cutter wheel included with tool.

Sure Grip Tube Slicer

Ideal for use on PEX Tubing

Also produces cuts in ABS, PVC, rubber and fabric reinforced hose up to 1 in. (25.4 mm) I.D. Rigid, durable nylon handle design provides sufficient leverage when cutting so that only moderate hand pressure is required. Stainless steel cutting blade is resharpenable and replaceable.

Endless Fencing Solutions

Ease the monotony of
Chainlink & Vinyl fencing

Speed is the only requirement

- Exclusive Hog Ring Pliers and Staples
- Fencing Pliers • Chainlink Fencing Staplers
- Chainlink Fence Tensioners
- Vinyl Cutting Saw Blades
- Notchers and Wrenches

Commercial Grade Chainlink Hog Ring Pliers and Staples

Commercial grade Hog Ring Pliers with Magazine installs 9-Ga. (3.8 mm) collated aluminum rings or exclusive 9-Ga. (3.8 mm) collated steel rings. Easily secures 7-Ga. (4.5 mm) wire to 9-Ga. (3.8 mm) chain link fence.

Designed to address the most stringent regulatory codes, this commercial grade hog ring pliers ensures uninterrupted operation to quickly install extra secure Malco 9 Ga. (3.8 mm) collated aluminum rings or exclusive 9 Ga. (3.8 mm) collated steel rings anywhere along a chain link fence. Long handles save time and effort with plenty of leverage and reach. The 25-count strips of collated rings can be loaded into the pliers' symmetrical magazine from either direction. A plunger feed automatically sets up each ring. There is no need to manually rotate the magazine out of the way as the pliers' clinching mechanism brings the ring forward of the nose for easy access to tension wire and fence. The magazine easily folds down for safe and easy storage of tool.

- Easy loading, auto-feed magazine.
- Long handles for extra leverage and reach.
- Easy access to tension wire and fence.
- Use with HRA5 Aluminum Rings or HRS5 Steel Rings

HRP5

HRA5

Aluminum Hog Rings, 9-ga. (3.8 mm)
Lightweight for Fast Installation

- Unique overlap clinch is twice as strong as closest alternative.
- 6061-T94 or 5052-H38 Alloy
- 25-piece loading strips with no sharp points are safe and easy to load.
- One 500 pack secures 1000 feet (305 m) of tension wire spaced at 24 in. (61 cm) intervals.

HRS5

Galvanized Steel Hog Rings, 9-ga. (3.8 mm)
Strong and Weather Resistant!

- Unique overlap clinch is twice as strong as closest alternative.
- Class 3 Coating Per ASTM A641
- 25-piece loading strips with no sharp points are safe and easy to load.
- The only collated 9-Ga. steel hog rings on the market.
- One 500 pack secures 1000 feet (305 m) of tension wire spaced at 24 in. (61 cm) intervals.

Collapsible magazine for easy storage!

Easy to Load and Lock

Chain link fence stapler

- Lightweight with easy spring actuated action
- Comfortable rubber-gripped handle
- Stop guide ensures proper hold on the hog ring
- 2 built-in wire cutters with 11-gauge (3 mm) capacity
- Compatible with HR1 (5/8 in., 16 mm) and HR2 (3/4 in., 20 mm) hog ring staples.

HRP1

Chain link fence stapler with magazine

- 50-staple magazine capacity
- Easy removal of magazine for less storage space
- 2 built-in wire cutters with 11-gauge (3 mm) capacity
- Compatible with HR2 (3/4 in., 20 mm) hog ring staples

HRP2

Chain link fence stapler with magazine

- Easy fit screw for fast removal of magazine (less storage space)
- 50-staple magazine capacity
- Compatible with HR4 (1-3/16 in., 30 mm) hog ring staples

Fencing Pliers for Chainlink Fence

Malco's fencing pliers are available in a highly maneuverable 8-inch (203 mm) length or high leverage 10-inch (254 mm) model.

This legendary fencing pliers design features three serrated jaw areas for gripping, pulling and tying fence wire. Also, three built-in wire cutter locations ensure easy access for cutting up to 9-gauge (3.8 mm) chain link fence or tensioning wire. A compact, rounded and tapered nose allows easy entry and reach into tight areas. Textured handle surfaces promote safe and sure control. And durable hardened all-steel construction offers long, dependable service life.

Vinyl Fence Picket and Rail Notchers

Designed specifically for use with vinyl fencing, Malco's fence picket and rail notchers make raised tabs in the end sections of vinyl rails and pickets. These louver-shaped tabs create a durable "lock" that prevents the rail or picket from pulling out of the openings.

Works in cold down to 40°F (4.4°C) and heat up to 120°F (48.9°C)

VFN1

Picket & Rail Notcher

Creates 1/2 in. (13mm) wide, 7/8 in. (22mm) deep, louver-shaped tabs in vinyl fence pickets and rails, locking the pickets and rails in place.

VFN2

Rail Notcher

Creates 3/4 in. (19mm) wide, 7/8 in. (22mm) deep, louver-shaped tabs in vinyl fence rails, locking the rails into post openings.

Compound leverage and exclusive Redline handles reduce the fatigue of repetitive motions.

Quickly lock rails and pickets in place.

Easily create 1/2 in. or 3/4 in. (13mm or 19mm) raised tabs on the job site.

The louver-shaped tabs create a durable lock that can withstand high winds and abrupt blows.

Vinyl Rail Removal Tool

Anyone who has had to remove and rework vinyl fence rails knows the difficulty of performing this task without damaging the rail or post. The economical and work-saving Vinyl Rail Removal Tool from Malco Products is a reliable, safe and easy way to remove rails from vinyl post and rail fences fastened together with a series of notched tabs! This little tool is a must have for all installers.

VRR1

- Blades are thin stainless steel with an angled lip for easy insertion between rail and post.
- A safety lanyard anchors the tool to prevent injury or loss of tool when extracting rail.
- Easy-to-spot yellow handles.

Offset Ratcheting Wrench

Two-way ratcheting action with an effortless handle-swing motion

This versatile, compact and lightweight Offset Ratcheting Wrench provides easy fastener access and fast, two-way ratcheting action with an effortless handle-swing motion. Finger switches are easily accessible to change ratcheting direction. It is ideal for installing or removing fasteners at chain link fence hook-up points. A 25 degree offset design maintains clearance between fingers and chain link fabric when fastening fence hardware such as tension bands, brace bands and rail end cups. The 12-point box heads, at each end of the wrench, grasp standard U.S. 1/2 inch and 9/16 inch hex fasteners from multiple angles. The box head keeps wrench in contact with the fastener for superior control. And through-hole socket openings accommodate any fastener length! Designed for long service life, this Offset Ratcheting Box Wrench exceeds ASME minimum torque requirements. Hardened socket openings and protective nickel chrome plating compliment a solid plastic core sandwiched between the tool's 1/8 inch (3.18 mm) steel plates to ensure that the ratcheting mechanism will function in harsh cold, wet or dirty working conditions.

RRW6

Catalog Number	Description	12 Pt. Hex Sockets	Nominal Length	Net Weight
RRW6	Ratcheting Wrench, Offset	1/2 and 9/16 in.	6.75 in. (172 mm)	5 oz. (142 g)

Multi-Track Pliers

Multiple slip joint pliers are ideal for use on conduit, pipe and cable connections.

- **Undercut Tongue & Groove Adjustment** will not slip! Jaws are held securely in selected position.
- **PermaLock® Fastener** eliminates nut & bolt failure.
- **Heat Treated Right-Angle Teeth** grip better, last longer.
- **No Pinch Point.** Lower jaw and reinforcing rib prevent handles from touching.
- **Long, Vinyl-Cushioned Handles** give powerful leverage with a gentle spread for easy one-hand operation.

Thin Design, Tempered Steel Halves allow access in confined spaces where other pliers & wrenches won't go.

STRAIGHT JAW

RUGGED V-JAW

V-shaped jaw creates more points of contact on pipe and round stock for stronger bite and more control.

Magnetic

Tip Tape Measures

At last, the obvious! Malco's "Magnetic Tip" tape measure is ideal for every ferrous metalworking project! Use it for HVAC ductwork installations, ceiling grid applications, metal stud framing and more. A powerful magnet and self-supporting 1 in. wide blade makes 1-person measurements and measuring elevations an easy task. The magnetic tip and big standout blade can even be used as a pick-up tool! A double riveted tip connection, abrasion-resistant, nylon coated blade and rubber-clad housing and blade stop assure lasting performance.

Powerful Magnets!

Ideal for working with metal!

Designed for:

**Metal Ductwork • Ceiling Grids • Metal Stud Framing
Measuring Elevations • One-Person Measurements •
Extended blade tip even works as pick-up tool!**

Zero Commencement:
When Hanging and pulling magnet,
deduct 1/16 in. from measurement.

Non-Magnetic Tape Measures

- Non Magnetic 1 in. Tape Measures
- Double Riveted Tip Connection
- Rubber-Clad Housing

Writable Tape Measures

Work Faster and Easier,
with Greater Efficiency

T425WM
Magnetic Measuring Tape

- Note one measurement or a quick series on the large writable surface. Use a common "pencil only" for writing.
- Both Tape Measures includes 2 carpenter pencils. You supply the thumb or pants as eraser.
- Long-life, nylon coated blade protects high visibility inch graduations and wall stud increments
- Double sided blade allows convenient orientation of case around obstacles. • Positive slide lock prevents blade creep.
- Optional reading from back side of blade, with curve face down facilitates stud increments, easier graduation locating and marking.
- T425WM is Magnetic Tipped and blade is self-supporting up to 9 feet (2.75 m).
- T425W is non-magnetic and its blade is self-supporting up to 10 feet (3 m).

Plumbers Roll

AC310

BROWN CLOTH
Closed coat, 120 grit
alum. oxide.

Abrasive cloth specifically designed for cleaning and preparing solder joint fittings

Creates a bite on metal surface for solder or paint. Aluminum oxide cutting grain rates 9.2 on MO scale (diamond=10). Flexible cloth back fits contours of any surface configuration and hard to reach areas. Long lasting urea resin bonding is water resistant.

Abrasive Mesh

Actual Size of Weave

AC5M

180 grit open mesh cleans with both sides,

requires only light pressure, lasts twice as long as cloth. Scrim is nylon weave. Waterproof adhesive bonding. Will not clog, load or break down.

Fin Straightening Tools

Fin straightening tools with adjustable nylon combs

The FST tool straightens commonplace 8, 10, 12 or 14 fins per inch. Use the FST2 tool for straightening closely spaced 16, 18, 20 or 22 fins per inch. Both tools feature one-piece adjustable combs. The resilient nylon comb material will not damage the soft aluminum fins of condenser or evaporator units. Malco fin tools function by either pushing or pulling and efficiently straighten fins in tight quarters or where multiple passes over bent fins are required. Comfortable offset handles provide a sure grip and protect knuckles from scraping.

Tube Benders

Versatile and economical spring-style tube benders

These budget priced tools are for bending soft tubing to any shape without collapsing walls. The special spring steel is zinc finished. One end is flared for quick tube insertion and removal. The 5 convenient sizes can be used economically for many jobs.

* No. TB102K Tube Bender Kit is a 5 piece set including shown Tube Benders above plus 1/4 in. (6.4 mm) size.

Multiple Purpose Andy Snips

Lightweight 12 in. (31 cm) aluminum handled combination snip, features a BIG 3 in. (76 mm) cutting depth. Inset steel blades feature a Knife like edge that produces a smooth slicing action for cutting thick or layered vinyl and a variety of other flexible non-ferrous materials.

Ultra Sharp High Carbon steel blades cut like a knife and are easily replaceable on the job!

MV12

Easily cut through Heavy vinyl siding lockseams and more with the Andy™ MV12 Snip!

Driver Bit Pouch

PD1

Cordless Drill & Bits not included.

- Easily store up to 4 driver bits of varying sizes.
- Securely attaches to most corded or cordless drills.
- Stays away from drill operation and keeps your sightline intact.

Driver Bit Pouch fits cordless or corded drills. Elastic slots allow user to conveniently store up to four 1/4-in shank bits on the drill. Durable elastic bands easily loop around motor housing to securely hold the durable 600 x 600 thread synthetic fabric pouch flush in place.

Tote Tray

1660

This heavy duty, crush proof tote tray is great for carrying hand tools and fasteners to the job site. Rust proof polypropylene body material is long wearing, lightweight and portable. Three roomy compartments to accommodate all the tools you need. Comfortable hand grip rolls to outside will not bite into palm of hand.

Electrical Pliers

PC9

Up Front Crimping Action

Insulated and uninsulated terminal and splice crimper with wire cutter up front.

Crimps insulated terminal sizes 12-10 (yellow) and 22-14 (red and blue). Tool also crimps uninsulated terminals 22-10 and 7-8 mm auto ignition terminals. Cuts bolts with perfect rethread and features six wire stripping stations for 22-10 ga. Constructed of induction hardened alloy steel. Pivot joint is made of hardened steel lifetime bushing. Black oxide oil finish with paint markings to highlight crimping functions. Red vinyl grips are comfortable, three pocket air cushion type.

WSC8

Cutter / Stripper / Crimper

Up front scissors action strips copper wire clean and easily cuts sizes 10 thru 20.

Bolt cutters leave a perfect rethread. Plier nose features serrated jaw and slim profile for pulling and putting loops on wire. Crimps all insulated and non-insulated solderless terminals including 7-8 mm auto. Lifetime pivot point assures greater joint strength and adds easy, precise adjustment capability. Black oxide, satin finish steel. Extra large red vinyl cushion grips.

WSC1S

Combination AWG-Metric

Automatic spring opening increases speed of stripping operation. Convenient lock protects precision cutting surfaces when not in use.

Carbide Tipped Rotary Percussion Bits

Use in any rotary or rotary percussion drilling device for unexcelled performance in brick, tile, granite, concrete, masonry and other similar hard and dense materials. Brazed tungsten carbide tips have 120° chamfer and are specially tempered for strength and long life.

Spade Type Wood Bits

WB6K
Wood Bit Kit

Unique designed ground points and cutting edges drill faster, cleaner holes, using less power than standard spade type bits. Cut straight or angled holes in soft and hard woods, plus formica, plaster, chipboard, foam core material, many non-metallic building sidings and foam insulation. Made of one-piece special heat treated tool grade steel.

Six "flat" 1/4 in. shank fits securely in conventional chucks. Easy to spot "size marking" is stamped on head. Resharpener with saw file or grinder. Available individually or in sets.

Guillotine Shear for Laminate Flooring

Quickly make square cuts in 5/16 in. (8 mm) laminate flooring.

A large stable plate with board stop supports ensure square, straight cuts up to 8-1/4 in. (210 mm) long.

- No noisy operation
- No sharpening required
- Optimum leverage reduces fatigue
- Durable lightweight frame and high leverage design offer long service life, easy handling & smooth cutting operation
- Cuts cleanly without distortion
- Generates minimal dust

Utility Caulking Gun

CG10

Flexible / Lightweight Caulking Gun

CG12

- Compact design stores in a toolbox.
- Handy puncture wire.
- Ladder size hang hook.

Easy Dispensing Caulking Gun

Designed for longer dispensing life

Includes Puncture Wire

CG18

Trigger adjustment screw compensates for normal wear to assure full dispensing stroke and extend tool life. Rotating barrel for maneuverability and easy caulk placement.

Professional Caulking Gun

Square Piston Design

CG20

Minimizes worker fatigue. User can regulate stroke to fit hand. Handy puncture wire folds inside handle.

Break-Away Knife

BAK

Positive blade locking mechanism and a forever-sharp break-away point.
Supplied with 1 heavy duty, 7 point blade in handle.

BAKRB (10 pack)
7 Point Heavy Duty Break-Away Blades for model No. BAK

Double Point Utility Blades

Extra durable, heavy gauge blades fit Malco 3PK, 4PK, 9PK knives & most other brands. Made of special alloy steel, precision ground to a fine cutting edge.

Quickly and safely dispense blades. Straight & Hook point blades are available in convenient 50 pack plastic dispenser.

UBS5 (5 pack)
UBS50 (50 pack)

UBH5 (5 pack)

Large hook points work great in multiple layers of asphalt shingles.

Quick Open Knife

9PK

"No tools" blade change is fast and easy with just a turn of the knob. Extra blades store in handle. Retractable blade advances to 3 locked cutting positions with aid of thumb button. Heavy duty, die-cast knife halves feature "integrated hinge" to eliminate lost or dropped parts. Contoured knife shape features "ergonomic safety grip". One blade supplied in retracting mechanism.

Twist knob to open

Displayed Open

Top Button Action

4PK

Die-cast heavy duty model comes complete with 3 double point blades. Safe, easy to operate, thumb action mechanism on top facilitates three cutting positions - fully extended, partially extended for carton opening and intermediate.

The Beast Shingle Remover

Shingle removal is a beast of a job but now, finally, there's a tool that's up to the task. The Beast Shingle Remover from Malco makes a tough job bearable. THE BEAST cleanly lifts off heavy loads of shingles and pulls nails in one motion. Long handled models are available with either an adjustable head for handling any roof pitch, or a versatile fixed head. Adjustable models also feature fiberglass handles and a choice of 48 in. (1.22 m) or 58 in. (1.47 m) tool lengths. All long handled BEASTS feature replaceable 10 gauge (3.40 mm) tempered steel blades with variable length teeth. A comfortable D-grip is also standard.

- Extra long teeth get under shingles.
- Aggressive short teeth pull nails.

SB48

Steel Handle
48 in. (1.22 m)

SB48A

Fiberglass Handle
48 in. (1.22 m)

3 position adjustable head makes the SB48A ideal for handling any roof pitch.

Position 1

Position 2

Position 3

Designed for roof cap removal and hard to get at dormers, overhangs, valley flashing and flashing around structures.

Handle those tight spots with a short handled "Baby" BEAST! For steep pitched roof caps and hard to get at dormers, overhangs, valley flashing and flashing around structures, this compact tool is indispensable. The short handled BEAST also features extra side slots for pulling out nails along walls and from under trim. One piece steel integral handle is covered with a comfortable foam grip.

Magnetic Sweep

Hand Held

Comfortable angled handle grip projects magnet forward and to the side of user for handy reach into confined areas yet keeps entire magnetic surface close to ground for efficiently picking up metal debris. Permanent magnets assure long service life and resistance to shock and vibration. Magnets are also replaceable. A contoured quick release sleeve allows debris to be easily removed from tool.

Powerful Magnetic Surface efficiently picks up debris.

Quick Release Sleeve allows debris to be easily removed.

Natural Slate Hand Tools

Rock Solid Solutions for Natural Roofing Slate

Slate Cutter

The compact, lightweight NSC1 EV Slate Cutter makes easy work of fitting a slate roofing tile with a quick re-sizing trim or a cut-out to accommodate a structure. The blade of this precision hand tool accurately navigates edge cuts, cleanly notches out square corners or cuts circle diameters as tight as 4 inches (102 mm). With the flat, unfinished side of the slate facing up, the tool's serrated, high carbon steel blade securely grips the unfinished surface to make a desirable chiseled cut look from the finished side of 4 - 8 mm natural roofing slate. Hardened all-steel construction with rust-resistant nickel plate and black oxide finishes ensures long service life.

*Traditional Hand Cut Look
Serrated upper jaw grips backside of slate
for controlled non-slip cutting.*

Slate Punch

The NSP1 EV Slate Punch produces a clean, recessed nail hole in 4 – 8 mm natural roofing slate. A big 2-1/2-inch (63 mm) throat depth allows convenient placement of the punch tip on the flat, unfinished side of the slate to create a desirable nail hole recess on the natural finished side as it punches through. Hardened all-steel construction with rust-resistant nickel plate and black oxide finishes ensures long service. The tool steel punch component is also replaceable.

*Clean Recessed
Nail Holes
(As Shown)*

Stone Coated Steel Roofing Cutter

Makes fast, safe, precise cuts in stone coated steel shingles, shakes and tile style roofing, including DECRA, METRO and GERARD brands up to 30% easier than other guillotines.

30% Easier!

Compound leverage and a generous handle length reduce user cutting force up to 30% versus other guillotine style cutters that pose a challenge to even the most seasoned pros. The shingle, including lock seam, is cut in one easy, steady motion. The shearing action has a "wiping" effect on the shingle's zinc coating that seals the cut edge to resist rust.

SCSRC1

The steel shingle, including lock seam, is cut in an easy, steady motion. The shearing action has a "wiping" effect on the shingle's zinc coating that seals cut edge to resist rust.

Large table surface allows sure control and prevents damage to work-piece.

A hardened steel blade and die offer reversible cutting edges for twice the cutting life, prior to sharpening. With the blade lock-pin in place, this portable cutter is safe to transport and sets up virtually anywhere on the job site. Designed with two different length leg tubes provides the user with two height options. A large table surface allows sure handed control and prevents damage to the work-piece. The table's "feed-thru" design also allows long angle cuts for roof hips and valleys.

Reversible Cutting Edges on hardened steel blade and die offer twice the cutting life, prior to sharpening. Blade and die are also easily replaceable!

With blade lock-pin in place, this cutter is safe to carry on to the job site.

Short Legs

Long Legs

Sturdy frame with two different length leg tubes provides working table height options of 21-1/4 or 29-1/4 inches.
