

HEAVY DUTY ALKALINE DEGREASER, DETERGENT AND DEODORIZER

- For cleaning air-cooled condensers/ evaporators, permanent filters, fan blades and more!
- Detergent-Degreaser-Deodorizer
- Ideal for microchannel
- Suitable for any coil design
- Rapid emulsification of grease and grime
- Metal safe - can be used for evaporator no-rinse applications per instructions where ample condensate will self rinse coil
- Tri-Pow'r HD aerosol provides a powerful foaming spray

Description

Tri-Pow'r HD is perfect for cleaning air-cooled condensers, evaporator coils, permanent filters, fan blades, motors and other general cleaning needs. Tri-Pow'r HD is a heavy duty alkaline cleaner that is very unique when compared to other similar alkaline coil cleaners. It's based upon positive emulsion technology which is the most effective technology used for removing grease and grime. Tri-Pow'r HD emulsifies or converts greasy deposits into a liquid form that can be easily flushed. It also contains a surfactant for "wetting" the greasy deposits as well as corrosion inhibitors for protecting equipment surfaces. Tri-Pow'r HD is a non-acid formula, very safe to use, and it's a deodorizer as well.

Application

Tri-Pow'r HD is an excellent cleaner for a variety of heavy duty cleaning jobs. When diluted at one part Tri-Pow'r HD to four to eight parts water, the solution can be used to clean air-cooled condensers, permanent filters, evaporator coils, fan blades, motors as well as other general cleaning applications. It can also be used at a dilution of one part Tri-Pow'r HD to 10 parts water in "no-rinse" applications on evaporator coils, particularly where there is sufficient condensate to rinse the coil. Tri-Pow'r HD is easily applied with any one of the Nu-Calgon quality sprayers.

Packaging

1 gallon bottle	4371-88
2.5 gallon pail	4371-86
55 gallon drum	4371-81
19 oz. aerosol	4371-75

Coil Cleaners

Tri-Pow'r®HD

Directions for Use (Liquid Versions)

- Goggles, gloves and other protective garments should be worn when using this product. System must be shut off.
- Apply using any of the Nu-Calgon sprayers or other durable, low pressure plastic sprayer.
- Prepare cleaning solutions by mixing one part Tri-Pow'r HD with four parts water for outdoor coils. Add the water to the sprayer first, then add Tri-Pow'r HD with four parts water for outdoor coils. Add the water to the sprayer first, then add Tri-Pow'r HD.
- Spray solution onto dirty surface and allow it to remain in contact for 5-10 minutes. Rinse thoroughly with water. Consider applying a coating of Cal-Shield, a coil protectant.
- Rinse out sprayer, spraying wand and nozzle.

Evaporators: Tri-Pow'r HD can be used in a non-rinse application by preparing one part cleaner with 10 parts water and apply with a sprayer, provided there is ample humidity being condensed to provide rinsing.

Permanent Filters: Add one ounce of Tri-Pow'r HD to each gallon of water. Allow parts to soak for 15 minutes and then rinse thoroughly with water.

Tri-Pow'r HD Aerosol: Wear protective gear, shake canister, remove cap and spray towards surface to be cleaned. Wait 5-10 minutes for foam to liquefy. Rinse the surface with water.

Read and understand the product's label and Safety Data Sheet ("SDS") for precautionary and first aid information. The SDS is available on the Nu-Calgon website at www.nucalgon.com.
