

OptiPure

Model: **QTI-2**
Part #: 160-52022

Snapshot

The QTI-2 is a dual-cartridge water treatment system with parallel-plumbed 15" Qwik-Twist cartridges that reduces sediment down to 0.5 microns, and reduces chlorine, taste & odor at a flow rate of 4.5 gpm for 45,000-gallons. The system includes IsoNet[®], OptiPure's patented scale inhibiting technology, which delivers consistent protection against the precipitation and accumulation of scale and provides a protective barrier to help guard against corrosion.

System Benefits

- IsoNet[®] - OptiPure's patented scale inhibiting technology helps protect equipment against scale and corrosion for the rated capacity of the system.
- Reduces maintenance frequency and cost, and extends equipment life.
- Gradient-density sediment filtration protects against dirt, rust and other debris down to 0.5 microns.
- High-capacity activated-carbon filtration makes water taste great and protects equipment against corrosive chlorine.
- Sturdy, powder-coated mounting bracket and full-flow inlet shut-off valve simplify installation.
- Built-in pressure gauge allows visual monitoring of when filters need to be changed.
- Inlet shut-off valve makes filter replacement quick and simple.
- Utilizes Qwik-Twist cartridges that make changing filters quick, easy and sanitary.
- NSF Certified under Standard 42.

ITEM #: _____ QTY: _____

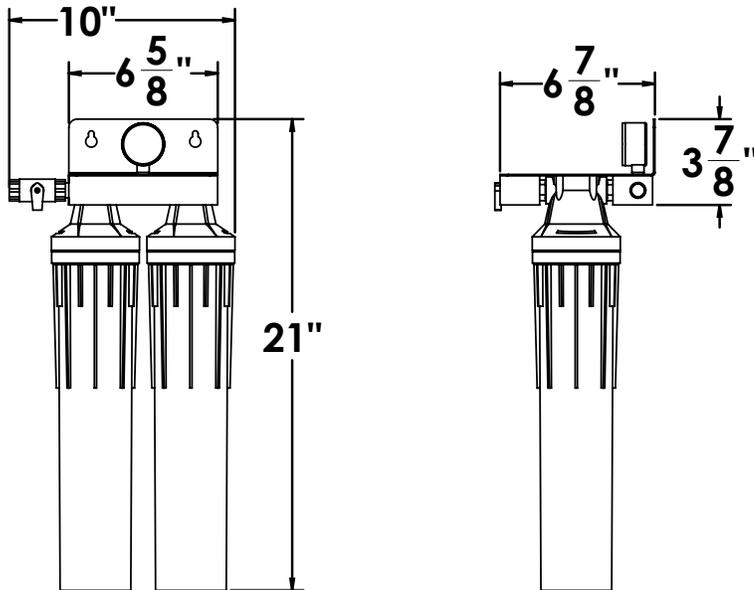

JOB NAME/NUMBER: _____

Application

ICE - Cubers up to 2,000 lbs. and Flakers up to 3,000 lbs.

Installation Tips

- Feed-water connection to system should be COLD only.
- Do not exceed system specifications for temperature and pressure.
- Provide a dedicated water line of at least 3/8" I.D. to the unit for consistent flow and pressure to the system.
- Allow 3" clearance below system for filter cartridge removal and replacement.
- Detailed installation, operation and maintenance manual are included with each system.

► Specifications

| System | |
|--|------------------------------|
| Dimensions (Height x Width x Depth, Inches) | 21.0"h x 10.0"w x 6.9"d |
| Connection - Inlet & Outlet | 3/8" NFPT |
| Operating Pressure Range | 10 - 125 psi (0.7 - 8.6 bar) |
| Inlet Water Temperature Range | 35° - 100°F (2° - 38°C) |
| Shipping Weight | 12 lbs. |
| Performance | |
| Chlorine, Taste, and Odor Reduction Capacity | 45,000 gals. (170,325 L) |
| Service Flow Rate | 4.5 gpm (17.0 lpm) |
| Sediment Reduction | 0.5 microns (nominal) |
| Scale & Corrosion Inhibitor | IsoNet® (200 grams) |

► Replacement Cartridges

| Model | Description | Part Number | Qty |
|--------|-------------|-------------|-----|
| CTOS-Q | Filter | 300-05835 | 2 |

► Options

| Model | Description | Part Number |
|-----------------|--------------------|-------------|
| Flush Valve Kit | QT Flush Valve Kit | 160-52912 |

System Tested and Certified by NSF International against NSF/ANSI Standard 42 Aesthetic Effects - Particulate Reduction (Class I) and the reduction of Chlorine, Taste and Odor.

► Warranty

All system components and assembly except for filter cartridges, separation membranes, permeate pumps, electric motors, diaphragm pumps, and rotary vane pumps shall be warranted against defects in workmanship for a period of 60 months from the date of original shipment. For complete warranty information, contact OptiPure customer service or go to www.optipurewater.com.

It is recommended that pre/post-filters and mineral addition cartridges are changed every 6 months, when capacity is reached or when feedwater pressure or flow becomes inadequate.

Membrane life varies depending on feedwater conditions and pre-filter maintenance. It is 12-18 months under typical conditions, but it can be as long as 3-5 years.

This product is for commercial use only and must be installed and maintained according to manufacturer's guidelines.

Do not use on water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.
